

LIST OF TABLES

TABLE	PAGE
1 Renal temperature recording before, during and after left renal hypothermia .....	23
2 Renal plasma flow and renal blood flow after release the occlusion of left renal artery and vein plus renal hypothermia for one hour .....	26
3 Glomerular filtration rate and urine flow rate after release the occlusion of left renal artery and vein plus renal hypothermia for one hour .....	28
4 Renal plasma flow and renal blood flow after release the occlusion of left renal artery and vein for one hour .....	32
5 Glomerular filtration rate and urine flow rate after release the occlusion of left renal artery and vein for one hour .....	35
6 Renal plasma flow, renal blood flow and glomerular filtration rate of the right kidney before and during occlusion of renal artery and vein of the left kidney	43
7 Plasma urea nitrogen, plasma potassium and plasma osmolality before and during occlusion of renal artery and vein of the left kidney .....	47

LIST OF TABLES

TABLE		PAGE
8	Clearances, filtration rates, excretory rates and reabsorption rates of urea nitrogen of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	49
9	Clearances, filtration rates, excretory rates and reabsorption rates of potassium of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	54
10	Osmolal clearances, negative water clearances and total solid excretory rates of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	59
11	Urine pH and urine flow rate of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	62

LIST OF FIGURES

FIGURE		PAGE
1	Left renal temperature recording before, during and after renal hypothermia for one hour .....	24
2	Renal plasma flow and renal blood flow after release the occlusion of left renal artery and vein plus renal hypothermia for one hour .....	27
3	Glomerular filtration rate after release the occlusion of left renal artery and vein plus renal hypothermia for one hour .....	29
4	Urine flow rate after release the occlusion of left renal artery and vein plus renal hypothermia for one hour .....	30
5	Renal plasma flow and renal blood flow after release the occlusion of left renal artery and vein for one hour .....	33
6	Glomerular filtration rate after release the occlusion of left renal artery and vein for one hour .....	36
7	Urine flow rate after release the occlusion of left renal artery and vein for one hour .....	37

LIST OF FIGURES

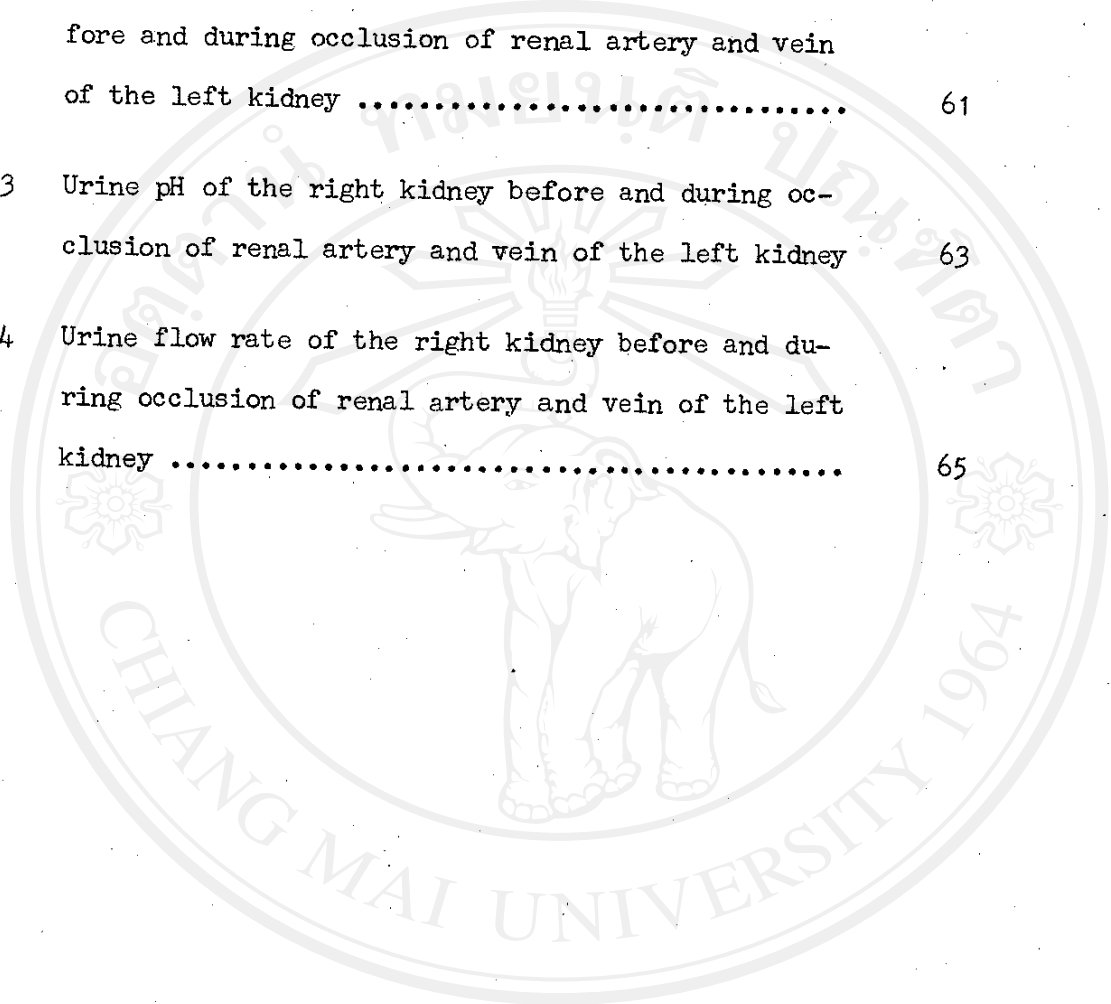

FIGURE	PAGE
8 Renal plasma flow after release the occlusion of left renal artery and vein for one hour in renal hypothermic and renal normothermic groups .....	38
9 Renal blood flow after release the occlusion of left renal artery and vein for one hour in renal hypothermic and renal normothermic groups .....	39
10 Glomerular filtration rate after release the occlusion of left renal artery and vein for one hour in renal hypothermic and renal normothermic groups .....	40
11 Urine flow rate after release the occlusion of left renal artery and vein for one hour in renal hypothermic and renal normothermic groups .....	41
12 Renal plasma flow and renal blood flow of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	44
13 Glomerular filtration rate of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	46
14 Plasma urea nitrogen concentrations before and during occlusion of renal artery and vein of the left kidney..	48

LIST OF FIGURES

FIGURE	PAGE
15 Clearances of urea nitrogen of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	50
16 Filtration rates, excretory rates and reabsorption rates of urea nitrogen of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	51
17 Plasma potassium concentrations before and during occlusion of renal artery and vein of the left kidney..	52
18 Clearances of potassium of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	55
19 Filtration rates, excretory rates and reabsorption rates of potassium of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	56
20 Plasma osmolalities before and during occlusion of renal artery and vein of the left kidney .....	57
21 Osmolal clearances and negative water clearances of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	60

LIST OF FIGURES

FIGURE		PAGE
22	Total solid excretory rates of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	61
23	Urine pH of the right kidney before and during occlusion of renal artery and vein of the left kidney	63
24	Urine flow rate of the right kidney before and during occlusion of renal artery and vein of the left kidney .....	65
