**ACKNOWLEDGEMENTS**

I would like to extend my appreciation and gratitude to Dr. Ampai Panthong, my advisor, for her helpful advice and encouragement. Without her assistance, this thesis would not have been possible.

I also wish to express my thanks to all staff of the Pharmacology Department of Chiang Mai University for providing valuable insights and guidance in addition to classroom instruction.

My special thanks go to Dr. Pittaya Tuntiwachwuttikul and her colleagues for generously supplying phenylalkane derivatives.

Finally, thanks are also due to the many individuals who made this thesis a success : the typist who carefully prepared the manuscript, my parents who provided financial support, and the many others too numerous to mention who provided suggestion, advice and encouragement.
