DELETION OF ALPHA GLOBIN GENE AND THE SEVERITY OF  
HOMOZYGOUS BETA THALASSEMIA

SUWANNA BUASEANGCHAN

THIS THESIS HAS BEEN APPROVED TO BE A PARTIAL  
FULFILLMENT OF THE REQUIREMENTS FOR THE  
DEGREE OF MASTER OF SCIENCE  
IN BIOCHEMISTRY

EXAMINING COMMITTEE

*T. Sanguansermsri*.....CHAIRMAN  
(Assoc. Prof. Dr. Torpong Sanguansermsri)

*Vichai Wongchai*.....MEMBER  
(Assist. Prof. Dr. Vichai Wongchai)

*Luksana Makonkawkeyoon*.....MEMBER  
(Assist. Prof. Luksana Makonkawkeyoon)

SEPTEMBER 1990

## ACKNOWLEDGEMENTS

The author wishes to express her gratitude and appreciation to Associate Professor Dr. Torpong Sanguansermsri and Assistant Professor Luksana Makonkawkeyoon for invariable guidance and kindest encouragement.

She is also indebted to Assistant Professor Dr. Vichai Wongchai, Chairman of the Department of Biochemistry, Faculty of Medicine, Chiang Mai University for his creative criticism and useful advice for the thesis.

Special thanks are expressed to assistant Professor Dr. Sittichoke Sangsoda, Department of Biology, Faculty of Science; and Dr. Nopporn Sittisombat, Department of Microbiology, Faculty of Medicine, for their help, advice and suggestions.

Her deep gratitude is heartily expressed to Professor Dr. Floyd W. Dunn for his kindly proof-reading the manuscript.

Thanks are expressed for the suggestions from and enjoyable contacts with her colleagues in the Human Genetics Laboratory.

Finally, she owes unending gratitude to her parents, her sisters, and her brothers for their constant love, understanding and encouragement throughout the long period of study.

This work was supported by National Center for Genetic Engineering and Biotechnology, Ministry of Science, Technology and Energy; the Stiftung Volkswagenwerk Hannover, Federal Republic of Germany; and the China Medical Board, Inc., New York.
