Acknowledgement	I
Abstract	III
Contents	VIII
List of Tables	XI
List of Figures	XIV
Abbreviations and Symbols	XV
Chapter I Introduction	1
1.1 Statement of the Problems	1
1.2 Objectives of the Study	4
Chapter II Review of Literature	5
2.1 Marketing and Pricing Research in China	5
2.2 The Marketing Roles and Pricing Objectives	6
2.3 Marketing Research Approaches	6
2.4 The Nerlovian Supply Theory	7
2.5 The Profit Maximization Approach	9
2.6 The Utility Maximization Approach	9
Chapter III Methodology	12
3.1 Scope and Limitation	12
3.2 The Conceptual Acreage Supply Model	15
3.3 Information Collection	18
Chapter IV Socioeconomic Background	19
4.1 Agricultural Economic Background	19
4.2 The Production of Major Crops	22
4.2.1 Rice	24
4.2.2 Cotton	25
4.2.3 Ramie	26
4.2.4 Tobacco	27
4.3 The Farmers' Decision Making and Occupation	28
4.4 Historical Formation of the Marketing and Pricing System	30
4.5 Marketing and Pricing Policies	35

	Page
4.6 Market Administration Agencies	38
4.6.1 The Commerce Bureau	38
4.6.2 The Price Administration Bureau	39
4.7 The Government Marketing Management Philosophy	39
Chapter V Market Structure and The Analysis of Market Performance	42
5.1 Market Structure	42
5.1.1 Market Components and Their Interrelationship	42
5.1.2 Government Marketing Representatives	47
5.1.2.1 The Rural Co-ops	48
5.1.2.2 The Grain Marketing Agency	49
5.1.2.3 The Food Marketing Agency	50
5.1.2.4 The Agricultural Production Input Marketing Agency	51
5.1.2.5 The Agricultural Machinery Marketing Agency	52
5.1.2.6 The Agricultural Extension Agency	53
5.1.3 Public and Private Marketing	54
5.1.3.1 The Trading Companies	54
5.1.3.2 The Private Middlemen and Companies	54
5.1.3.3 Rural Fairs and Public Marketing Activities	55
5.1.4 Economic and Institutional Barriers to Market Entry and Exit	55
5.1.4.1 Registration and Operation Rules	56
5.1.4.2 Tax Premium and Tax Preference	57
5.1.4.3 Employment and Residence Rules —Divided Citizenship	57
5.1.4.4 People's Wealth, Market Entry Cost	58
5.2 Market Performance	58
5.2.1 Stability of Prices and Supply of Agricultural Products	59
5.2.2 Farm Price, Marketing Cost and Market Margin	63
5.2.3 Agricultural Specialization, Productivity and Growth Rate	65
5.2.4 Land Utilization	66
5.2.5 Farmers' Income Level, Composition and Distribution	67

	Page
5.2.6 Agricultural Input Level	69
5.2.7 Resource Allocation and Economic Efficiency	70
5.2.8 Consumers' Welfare	71
5.2.9 Regional Marketing Business Protection	72
Chapter VI Agricultural Production Response to Pricing and Marketing Systems	74
6.1 Justification of the Dependent and Explanatory Variables	74
6.1.1 The Dependent Variable	75
6.1.2 The Explanatory Variables	75
6.1.2.1 Institutional Changes	76
6.1.2.2 The Expected Farm Prices	78
6.1.2.3 The Expected Farm Price of Alternative Crops	79
6.1.2.4 The Agricultural Input Prices	78
6.1.2.5 The Lagged Planted Area	80
6.1.2.6 The Price and Yield Risk Variables	82
6.1.2.7 Regional Variables	86
6.1.3 The Specification of the Seemingly Unrelated Model	86
6.2 Empirical Results	88
6.2.1 Basic Statistics of the Original Variable Data	88
6.2.2 Correlations Among Variables	89
6.2.3 The Appropriateness of The SURE Model	92
6.2.4 The Estimation Results of Alternative Regression Models	95
6.3 Discussions	101
6.3.1 The Own-price Elasticities	101
6.3.2 The Cross-price Elasticities	105
6.3.3 Impact of Institutional Changes	113
6.3.4 Impact of Price and Yield Risks	116
6.3.5 The Lagged Planted Area	118
6.3.6 The Regional Variables	119
Chapter VII Summary, Conclusion and Recommendation	121
7.1 Summary and Conclusion	121
7.2 Recommendation	124
References	126
Appendix	129

List of Tables

Table	Page
1 Composition of the Gross Value of Agricultural Production in Hunan Province	21
2 Commercial Rates of Major Crops	22
3 Major Cropping Patterns in Hunan Province in 1990	23
4 Crop Planted Area, Yield and Production in Hunan Province in 1990	24
5 Rice Production Statistics	25
6 Cotton Production Statistics	26
7 Ramie Production Statistics	27
8 Tobacco Production Statistics	28
9 Major Institutional Events	31
10 The Adjustment of Agricultural Prices in March 1979 in Hunan Province	34
11 Rural Commercial Agencies and Agents	46
12 Market Shares of Private and Non-private Sectors	47
13 Development of the Rural Co-ops in Hunan Province	49
14 Grain Marketing in Hunan Province	50
15 Quotation Marketing of Fertilizers	52
16 Government Subsidies for the Marketing of Grain and Edible Oil	65
17 Farmers' Income Sources	67
18 Economic Returns to Land and Labor	69
19 Agricultural Input Level in Hunan Province	70
20 The Planted Area of 4 Crops in Hunan Province	76

	Page
21	Two Institutional Events and Their Dynamic Impacts on Agricultural Production 77
22	Agricultural Input and Output Price Indexes 81
23	Chemical Fertilizer and Pesticide Prices 81
24	The Standard Deviations of Farm Price of the Four Crops in Hunan Province 83
25	The Standard Deviations of Yield of the Four Crops in Hunan Province 84
26	The Percentage Changes of Farm Prices of the Four Crops in Hunan Province 85
27	The Percentage Changes of Crop Yields of the Four Crops in Hunan Province 85
28	The Divided Eleven Regions in Hunan Province and the Seven Regions in Each Crop Model 87
29	Descriptive Statistics of the Original Data 89
30	Correlations Among Variables 90
31	The Estimated Co-efficients of the Explanatory Variables from Five Seemingly Unrelated Regression Models 97
32	The Own Price Elasticities of the Four Crops 102
33	The Supply Elasticities of Rice, Cotton, Tobacco and Jute/Ramie Obtained by Several Authors in Early Researches 103
34	The Prediction of the Changes of Crop Planted Areas in Hunan Province Providing the Crop Own-price Increase by 1 Yuan on the Base of Year 1990 105
35	The Cross Price Elasticities of the Four Crops 106
36	The Prediction of the Changes of Crop Planted Areas in Hunan Province Providing the Competing Crop price Increases by 1 Yuan on the Base of Year 1990 107
37	Simulation Results of Price Policies Implementation (1-4) 109
38	Coefficient Table of the Institutional Variables 113
39	Prediction of Crop Planted Area Changes Resulted by Institutional Changes in 1982 and 1985 114
40	The Coefficients of the Price and the Yield Risk Proxy Variables in Model 1 and Model 4 117

	Page
41 The Coefficients of the Lagged Planted Area Variable	119

Appendix

A1 Farm Price, Farm Price Index and Input Price Index	129
A2 Relative Price Rates and Price Indexes	130
A3 Agricultural Output Prices in Hunan Province	131
A4 Crop Production Cost, Income and Profit Levels	132
A5 Crop Outputs, Marketed Amounts and Commercial Rates	133
A6 Yield, Planted Area and Output of Rice, Cotton, Ramie and Tobacco in Hunan Province and Its 10 Prefectures	134
A7 Government Retailing Prices of Main Food Commodities in Changsha (the Provincial Capital)	138
A8 Results of OLS Regressions of the Four Crop Models	140
