## ACKNOWLEDGEMENTS

I would like to thank my thesis advisors, Dr. Nopporn Sittisombut and Associate Professor Dr. Niwat Maneekarn, for their valuable guidance, excellent patience, encouragement, and support throughout my study.

I wish to thank Dr. Ampica Mangklabruks, for many valuable discussions, Dr. Umnat Mevatee, for his help on population genetics. Dr. Watchara Kasinrer, for his helpful advice, and Dr. Wasun Chantaratita, for his advice and provision of the UV-crosslinker.

I would like to thank Dr. Trevor Smith, McKean Rehabilitation Institute who provided the information of leprosy patients.

Sincere thanks are given to Dr. Anon Manmontri and Mrs. Kittika Kanjanaratanakorn, Medical Education Section, for their helpful advice of the statistical analysis.

I am particular grateful to Professor Dr. Dasyanee Chantanayingyong, Faculty of Transfusion Medicine, Mahidol University and Miss Warunee Kunachiwa for providing HLA-DQA1 and HLA-DQB1 primers and probes.

Special thanks to Miss Anchalee Sisayanarain for DNA sequence analysis, laboratory technical guidance and her warm friendliness.

Finally, I would like to thank my parents and sisters, for their support in everyway throughout my study.

Donruedee Wongkuttiya.
