ACKNOWLEDGMENT

It is my pleasure to extend profound gratitude and respect to many people and institutions who have helped in the completion of this research.

First and foremost, I wish to thank my supervisor, Dr Sakda Jongkaewwattana, for his invaluable advice, encouragement and patience throughout all stages. I am also indebted to his enormous effort in the correction and revision of my thesis manuscript.

I am grateful to Associate Professor Dr Bejavan Rerkasem, for her guidance, stimulating suggestions, encouragement and genuine support in so many different ways during most of time of my study.

I would like to greatly extend thanks other numbers of thesis examining committee, Assistant Professor Dr Benchaphun Shinawatra and Associate Professor Suthat Julsrigival, whose constructive comments and generous advises are undoubted beneficial for this study.

Special appreciation goes to Assistant Professor Dr Soonthorn Buranaviriyakul, who have made valuable comments and advises for success of statistical techniques of this thesis. Gratitude is also due to Associate Professor Dr Aree Wiboonpongse and Dr Rojare Noppakoonwong for their special comments.

I wish to express my sincere thanks to all ajarns and staff of Agricultural System Program for sharing their knowledge and providing various forms of assistance and helps during my study period.

I am very much delighted to pay thanks to all AGS students, for their genuine kindness and friendships, particularly my classmates, Benjawan, Budsara, Jarus, Charal, Chabbi, Jigmi, Dac, Somchit, Tospol, Panomsak, and our Chinese friends Gan, Kang, Wang, Li, Huang, Cai, Dong as well as Dou. I received Mr. Fan Xingming's constant help and cordial support, to him, I am also thankful.

Rice Research Institute of Yunnan Agricultural University (YAU) provided me

technical assistance with respect to implementation and crop management of the field experiment. In this regard, all my directors and colleagues of YAU, especially Professor Shi Changjun, Associate Professor Zhang Shuhua, Deputy Directors Qin Delin and Wang Xi, and assistants Chen Lei, Tao Guangxi, Huang Dajun, Wang Lixin, and Pu Youhua, whose encouragement and significant contribution are gratefully acknowledged. Special thanks are also offered to Profs Li Zhengyou, Zhu Baochu, Yang Chengying, Tan Xuelin, and Mrs Lian Huifang whose perspective, experience, and generous helps are grateful beneficial for my career.

Yunnan Soil and Fertilizer Testing Center & Agricultural Products' Quality Supervisory Station (YSFTC & APQSS) is specially mentioned for providing whole laboratory analysis which is crucial for the success of this research. In this regard, the all staff of YSFTC & APQSS, especially Senior Agronomists Che Si, Assistant researcher Liu Youlin and Fan Yadong, who showed genuine co-operation are heartiest thankful.

I am deeply grateful to the Ford Foundation for the scholarship grant to study at AGS Program of Chiang Mai University in Thailand, which enabled me to gain both knowledge and experience.

Last but not least, special recognition goes to my husband Zheng Hong, my son Erda, my parents Chen Guangyu and Wen Jucan, my mother-in-law Wang Shangli, and my brothers and sisters, whose love, understanding, inspiration are the source of motivation for me to pursue study.
