Abstract in English	v
Abstract in Thai	vii
List of Tables.....	xi
List of Figures.....	xii
1. Introduction.....	1
1.1 Air pollution: Problem.....	1
1.2 The sources and causes of air pollution.....	1
1.3 Effects of air pollution.....	2
1.3.1 Health effect.....	2
1.3.1.1 Particulate toxicology.....	2
1.3.1.2 Effects of sulfur oxides.....	4
1.3.2 The effects of air pollution on other organisms.....	5
1.3.3 The effects of air pollution on ecosystems	5
1.3.4 The effects of air pollution on materials.....	5
1.3.5 The effects of air pollution on climate.....	5
1.4 Energy and air pollution.....	7
1.5 Rationale/Hypothesis.....	9
1.6 Purpose of the study.....	9
2. Literature review.....	11
2.1 Microscopic features of fly ash.....	12
2.2 Trace elements content in fly ash.....	12
2.3 Trace elements enrichment of soil around power plant.....	16
2.4 Effects on soil pH.....	20
2.5 Effects of ash disposal on terrestrial ecosystems.....	20

2.5.1 Effects on surface and ground water.....	21
2.5.2 Effect on vegetation.....	21
2.5.3 Food chain effect.....	23
3. Study area.....	24
3.1 Topography of the area.....	24
3.2 Study sites.....	28
3.3 Climate.....	32
3.3.1 Rainfall.....	32
3.3.2 Temperature.....	32
3.3. Wind.....	34
3.3.4 Thermal inversion.....	34
3.4 Vegetation - forest type.....	38
3.5 Mae Moh Mine and Power Plant.....	38
3.5.1 Background history.....	38
3.5.2 Calculation of potential movement of some trace and major elements.....	39
4. Material and method.....	42
4.1 Apparatus.....	42
4.2 Chemicals and materials.....	44
4.3 Sampling collection.....	45
4.3.1 Soil samples.....	45
4.3.2 Leaves samples.....	45
4.3.3 Dust samples.....	45
4.4 Vegetation survey.....	46
4.5 Chemical analysis.....	46
4.5.1 Sample preparation.....	46
4.5.1.1 Aqua regea.....	47

4.5.1.2 Lithium tetraborate fusion procedure.....	47
4.5.1.3 Particulate on filters.....	48
4.5.2 Analysis of AAS.....	49
4.5.3. Working Condition of AAS.....	50
4.5.4 Calculation of concentration.....	50
4.5.5 Hydride generation- special methods for arsenic.....	50
4.6 Soil pH measurement.....	52
4.7 Soil moisture and percentage of fine particles.....	52
4.8 Scanning electron microscope.....	52
5. Results.....	53
5.1. Soilsamples.....	53
5.1.1 Soil pH.....	53
5.1.2 Major elements.....	53
5.1.3 Trace elements.....	53
5.1.4 Arsenic	55
5.2 Dust samples.....	69
5.3 Vegetation and forest in the area.....	69
6 Discussion.....	72
6.1 Trace elements in soils.....	72
6.2 Difference In element concentration between two depths.....	75
6.3 Trace element concentration-distance relationship.....	76
6.4 Arsenic content in soil samples.....	78
6.5 Environmental risk assessment.....	84
Conclusion and recommendation.....	87
References.....	89
Appendix.....	94
Vita.....	111

LIST OF TABLES

Table 1.1	Molecular composition, characteristics and source of major air pollutants...	3
Table 1.2	Effects of air pollutants on plants.....	6
Table 2.1	Concentration of some elements in coal, fly ash and bottom ash from Mae Moh.....	14
Table 2.2	Estimated maximum deposition of trace elements into soil adjacent to a coal-fired power plant.....	19
Table 2.3	Estimated trace element contamination of vegetation arising from emission from a coal-fired power plant.....	22
Table 3.1	Study sites.....	28
Table 3.2	Estimated lignite consumption and ash production in Mae Moh Power Plant.....	40
Table 3.3	Estimated concentration of some elements enriched surface soil.....	41
Table 4.1	Working condition for AAS.....	51
Table 5.1	Soil pH, moisture and percentage of fine particles.....	54
Table 5.2	Peak area for As calibration curve.....	55
Table 5.3	Weight of dust samples.....	69
Table 5.4	Forest type and vegetation's condition in each study site.....	70
Table 6.1	Natural content of metals in rocks.....	73
Table 6.2	Concentrations of trace elements in coal rocks and soil.....	74

LIST OF FIGURES

Figure 1.1 Type of fuel source	10
Figure 1.2 Production and consumptions energy in Thailand.....	10
Figure 2.1 Electron micrographs of fly ash particles of different size.....	13
Figure 2.2 Modeled mass deposition of fly ash around power plant.....	18
Figure 3.1 Map showing location of Mae Moh Lignite Mine and Power Plant.....	25
Figure 3.2 Geological map of Mae Moh area.....	26
Figure 3.3 Map of study area.....	29
Figure 3.4 Photo of study site.....	30
Figure 3.5 Average rainfall in Mae Moh area.....	33
Figure 3.6 Ambient temperature at Mae Moh area.....	33
Figure 3.7. Windrose diagram.....	35
Figure 4.1 Block diagram of an AAS.....	43
Figure 5.1 Aluminum content of soil samples.....	56
Figure 5.2 Calcium content of soil samples.....	57
Figure 5.3 Iron content of soil samples.....	58
Figure 5.4 Magnesium content of soil samples.....	59
Figure 5.5 Chromium content of soil samples.....	60
Figure 5.6 Copper content of soil samples.....	61
Figure 5.7 Manganese content of soil samples.....	62
Figure 5.8 Nickel content of soil samples.....	63
Figure 5.9 Lead content of soil samples.....	64

Figure 5.10 Zinc content of soil samples.....	65
Figure 5.11 Arsenic peaks (standards).....	66
Figure 5.12 Arsenic peak (sample).....	67
Figure 5.13 Arsenic content of soil samples.....	68
Figure 6.1 Concentration of trace elements in 18 study sites.....	80
Figure 6.2 Concentration of arsenic in 18 study sites.....	81
Figure 6.3. Estimated concentration enriched surface soil.....	82
Figure 6.4. Arsenic content in dust samples around Mae Moh area.....	83
