Abstract in English vi

Abstract in Thai viii

List of Tables xii

List of Figures xiii

Chapter 1- Introduction 1

Chapter 2 -Literature Review 4

Chapter 3- Methodology

3.1 Site Description 13

3.2. water Quality Analysis 19

3.3. Pesticide Residue Analysis

3.3.1. Principle 22

3.3.2 Sampling Procedure 22

3.3.2. Sample Preparation 23

3.3.3. Gas Chromatographic Determination 24

3.3.4. Apparatus/Chemicals 25

3.4. Benthic community analysis

3.4.1. Sampling Procedure 28

3.4.2. Sample Preservation 28

3.4.3. Sorting and Identification 28

3.5. Data Analysis

3.5.1 Cluster Analysis.....30

3.5.2.Diversity Index.....30

3.5.3. Evenness.....31

3.5.4. Community Structure Analysis.....31

3.5.5. Lognormal Distribution of Benthic Communities.....31

3.5.6. Principle Component Analysis.....32

3.5.7. Ordination of the Families.....33

3.5.8 .MANOVA.....33

3.5.9. Multiple Correlation.....34

3.5.10. Multiple Regression.....34

Chapter 4- Results

4.1. Results of Water Quality Analysis.....35

4.2 Result of Substrate coverage.....43

4.3. Results of Pesticide Residue Analysis.....44

4.4. Results of Benthic Community Analysis 45

4.5. Results from MANOVA.....55

4.5 Correlation between Physico-Chemical, Biological Parameters and % substrate coverage.....56

4.6 Regression Analysis.....57

Chapter 5- Discussions.....59

Chapter 6-Conclusions and Recommendations.....79

References.....81

List of Tables

Table Page

1. Monthly rainfall at Chomthong District, 1992-1993, mm.....19
2. Distribution of organochlorine pesticide in the sediments of stream A and B.....45
3. Summary of the result from MANO VA comparing the two streams in terms of biological indices, water quality parameters and percent substrate coverage 55

List of Figures

Figures Page

1. Topographic map of northern Thailand.....15
2. Location of study sites in the watershed area of Chomthong District.....16
3. Flow chart diagram for extraction of organochlorine pesticide analysis in sediments.....26
4. Flow chart diagram for clean up of organochlorine pesticides.....27
4. Selected physico- chemical parameters of water quality for stream A and B in different seasons.....38
5. Key nutrient water quality parameters for stream A and B in different seasons.....40
6. Cluster analysis of sites and season based on water quality parameters.....41
7. Result from percent substrate coverage.....43
8. Cluster analysis of sites and season based on biological parameters.....46
9. Community structure of the benthic community in each stream .....47.
10. Diversity of the families in different seasons in two streams.....49
11. Lognormal distribution of the families in the geometric class of abundance..... 51
12. Ordination of the families based on factor 1 and factor 2 from varimax rotation using benthic community 53
