ACKNOWLEDGEMENTS

I wish to express my appreciation and deepest gratitude to my advisor, Assistant Professor Dr. Pradya Somboon, Department of Parasitology, Faculty of Medicine, Chiang Mai University, for his valuable advice, supervision, encouragement, understanding during the various stages of this research and for his kindness and valuable criticism of this manuscript.

I sincerely express my gratitude to my co-advisor, Associate Professor Keturat Sukhavat, Head of the Department of Parasitology, Faculty of Medicine, Chiang Mai University, for his encouragement, criticism and valuable suggestions.

I am deeply indebted to Lecturer Dr. Amnat Rojanapaibul, Department of Biology, Faculty of Science, Chiang Mai University, for his keen interest and helpful suggestions on reading and guidance on this thesis.

I always remember and wish to express my appreciation to Associate Professor Wej Choochote, Associate Professor Dr. Nimit Morakote, Department of Parasitology, for their kindness, helpful suggestions on laboratory techniques, and rectifying this thesis.

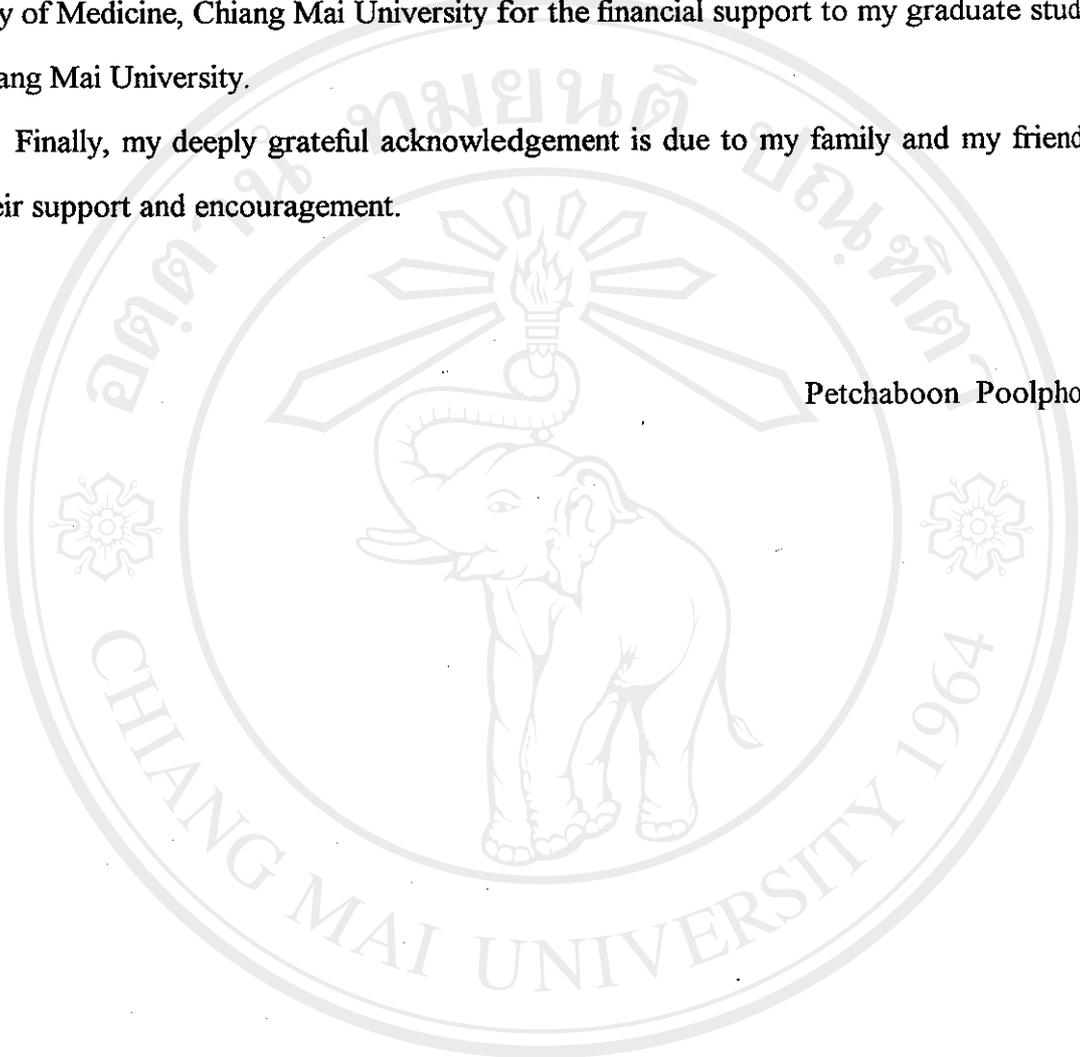

My special thanks to Lecturer Benjawan Pitasawat, Mr. Prasong Chaiwong and Mr. Prasert Ke-ha, Department of Parasitology for their valuable suggestions and help in collecting specimens in Chiang Mai province.

I would like to thank all staff and technicians of Department of Parasitology for co-operation and generous help.

Special thanks are due to Head of Public Health Office, Ubon Ratchathani province, who gave me the opportunity to undergo further studies and thanks to the Faculty of Medicine, Chiang Mai University for the financial support to my graduate study at Chiang Mai University.

Finally, my deeply grateful acknowledgement is due to my family and my friends for their support and encouragement.

Petchaboon Poolphol
