## ACKNOWLEDGEMENTS

I am deeply indebted to the many people and organizations that played significant roles and provided assistance throughout this study and research. In particular, special thanks go to my advisor and Chairman of this thesis examining committee, Dr. Songsak Sriboonchitta (the man who sets high standard for his students), for his stimulating suggestions and patience. This thesis could not have been completed without his invaluable guidance and encouragement. I would also like to thank Assoc. Prof. Dr. Aree Wiboonpongse, for her insightful comments and suggestions from the beginning of this research, and for her considerable concern about my family after my son's birth. Constructive comments and criticisms from Mr. Phrek Gypmantasiri and Dr. Kamol Ngamsornsuke are also gratefully acknowledged.

Thanks also go to Dr. Benjavan Rerkasem and Dr. Benjaphan Shinawattra, for their help on my study in the first semester of 1993. I am also deeply indebted to Mr. Gao Jingqing, Mr. Zhou Xiaogui, and Mr. Lu Yongliang, for facilitating my study and research at Chiang Mai University, Thailand.

I am also grateful to the Krung Thai Bank Co. Ltd. (especially Dr. Wallop, Dr. Vichya and Mr. Chalerm Thatrimontrichai provided generous help) and the Northern Development Center of the National Economic and Social Development Board (NESDB) in Thailand, for providing me the data used in this research.

Likewise, thanks also go to the Kachorn Tingthanathikul Foundation (KTF), for financing my graduate study in Thailand.

To my friends in the Agricultural Systems Program, I am appreciated of their friendship and substantial help extended to me and to my family. Here mentioned are three senior friends who had helped me a lot when I conducted my research in Thailand, i.e., Pee Tospol, Pee Pilai, and Pee Thipathorn. It is also my obligation to

write down their names of the friends who had helped me, not only because I want to show my thanks, but also leave the name list to my son Tai-Ran (He was born in Thailand, therefore I picked up the name for him -- "Tai-Ran", which sounds like "Thailand") and let him know in the future that who had ever helped him when he was too young to remember. These friends are: Cai Kui, Dong Ruihua, Li Zhengyue, Huang Yaqin; Budsara, Dac, Daen, Jarus, Long, Pattana, Poo, Rasee, Sanya, and Tanya, etc.

The effort of this thesis would not have been possible without patient support of my wife, Liqin Dong. While this effort has been hard and at times frustrating, you have stood with me. To you, Liqin, I dedicate this thesis. Thank you.
