Title page.....	i
Approval sheet.....	ii
Acknowledgment.....	iii
Abstract.....	iv
List of Tables.....	xi
List of Figures.....	xiii
Abbreviations and Symbols .....	xv
1. Introduction .....	1
1.1 Properties of lead and Analytical Methods .....	2
1.2. Toxicity of Lead .....	4
1.3 Lead in Environment .....	6
1.4 Rational and aim of present study .....	11
2. Experimental .....	13
2.1 Lead levels in roadside dusts .....	13
2.1.1 Methods .....	13
2.1.1.1 Sampling .....	13
2.1.1.2 Collecting method.....	15
2.1.1.3 Pretreatment of samples.....	15
2.1.1.4 Apparatus & materials.....	15
2.1.1.5 Cleaning of the glassware.....	16
2.1.1.6 Digestion of dust sample.....	17
2.1.1.7 Analysis using AAS .....	17
2.1.1.8 Quality Assurance and Quality Control.....	18
2.1.2 Results .....	20
2.1.2.1 Quality Control.....	20
2.1.2.2 Results of the study samples.....	21
2.1.3 Discussion and Conclusion .....	24

2.2 Lead and suspended particulate matters (SPMs) in the air of Chiang Mai City....	27
2.2A Monitoring using mask filters worn by traffic policemen .....	27
2.2A.1 Methods .....	27
2.2A.1.1 Materials and apparatus.....	27
2.2A.1.2 Distribution and collection of the mask filters.....	27
2.2A.1.3 Analytical Method.....	29
2.2A.2 Results .....	31
2.2A.2.1. Quality control of lead analysis in monitoring using mask filter.....	31
2.2A.2.2. Lead and SPMs levels monitoring using mask filters.....	33
2.2A.3 Discussions.....	36
2.2A.4 Conclusions.....	36
2.2 B Lead and SPMs levels in the air monitoring using high volume air sampler ..	36.
2.2B.1 Materials and Method.....	37
2.2B.1.1 Apparatus and chemicals.....	37
2.2B.1.2 Method.....	39
2.2B.1.2.1 Study sites and sampling period.....	39
2.2B.1.2.2 Collecting methode.....	39
2.2B.1.2.3 Analytical Method.....	39
2.2B.1.2.3.1 Measurement of SPMs.....	39
2.2B-1.2.3.2 Analysis of lead deposited on the machine filter.....	39
2.2B.1.2.3.3 Calculation of lead level.....	41
2.2B.2 Results.....	41
2.2B.2.1. Quality control of lead analysis.....	42.
2.2B.2.2. Traffic volume .....	43
2.2B.2.3. The level of Suspended particulate matters in the air.....	45
2.2B.2.4. lead levels in the air in Chiang Mai City.....	46
2.2B.3 Discussions .....	48
2.2B.4 Conclusions.....	58
Recommendation.....	60
References .....	63

Appendix I	Average Daily Rainfall, Temperature, Duration of Sunshine of Chiang Mai City, 1995 .....	68
Appendix II	Traffic volume at some major roads of Chiang Mai City in 1995 ( motor vehicle number/hour).....	69
Appendix III	Number of motor vehicles registration in Chiang Mai (1985-1995) .....	70
Appendix IV	Number of vehicle registration fiscal years 1970 - 1990 in Thailand .....	71
Appendix V	Situation of lead additive usage in gasoline in Thailand .....	72
Curriculum vitae.....		73

มหาวิทยาลัยเชียงใหม่  
Chiang Mai University

## List of Tables

<b>Table</b>	
2.1.1	Lead level of SMQC dust .....20
2.1.2	Results of SRMs measurement.....21
2.1.3	Correlation coefficient ( $\gamma$ ) of calibration curve.....21
2.1.4	lead levels in 18 major roadsides dust .....22
2.1.5	Lead levels in dusts from Doi-suthep National Park .....23
2.1.6	Lead levels in roadside dust along Chiang Mai- Sam Kam Pang road .....23
2.1.7	Lead levels from addendum analysis.....24
2.2A.1	Background Lead level of new mask filters.....31
2.2A.2	Recovery of lead analysis of mask filter using spiked sample.....32
2.2A.3	Correlation coefficient( $\gamma$ ) of calibration curve of lead analysis in mask filter.....32
2.2A.4	Mean $\pm$ SD, median(min-max) of lead and SPMs levels monitoring using mask filter in different batches.....34
2.2A.5	lead and SPMs levels (67 Cases) monitoring using mask filter monitoring using mask filter during the period from 24 May 1995 to 5 July 1995.....33
2.2A.6	lead and SPMs levels (29 Cases) monitoring using mask filter during the period from 27 September 1995 to 6 December 1995.....35
2.2B.1	Background level of lead in new filters.....42
2.2B.2	Recovery of lead analysis using spiked machine sampler filter.....42
2.2B.3	Coefficient of calibration curve of lead analysis of monitoring using High Volume Air Sampler.....43
2.2B.4	Traffic volume at air sampling sites.....44
2.2B.5	SPMs levels at study sites monitoring using High Volume Air Sampler ...45
2.2B.6	SPMs levels of air at control sites monitoring using High Volume Air Sampler.....46

2.2B.7	Lead levels in study sites monitoring using High Volume Air Sampler.....	47
2.2B.8	Lead level of air at control sites monitoring using High Volume Air Sampler.....	47
2.2B.9	Lead and SPMs levels from the present study using High Volume air-sampler and standard levels.....	50
2.2B.10	Lead and SPMs levels in Chiang Mai from present study, Bangkok and Chiang Mai in 1993.....	52
2.2B.11	Air monitoring using mask filter and high volume air sampler.....	54
2.2B.12	lead and SPMs level in time series monitoring using mask filter worn by traffic policemen .....	56
2.2B.13	Lead and SPMs level in air of Chiang Mai City during the period May-July and September- December monitoring using mask filter worn by traffic policemen .....	56
2.2B.14	Road Construction and SPMs level.....	57

## List of Figures

Figure	
2.1.1	Map of study sites of lead level in roadside dust.....14
2.1.2	Lead levels in roadside dust among major crossroads in Chiang Mai City.....25
2.1.3	The lead levels in roadside dust and rainfall amount.....25
2.2A.1	Picture of mask filter used by traffic policemen.....28
2.2B.1	Map of study sites of air quality study.....38
2.2B.2	One picture of study site using High Volume Air Sampler.....37
2.2B.3	The method to select filter for analysis.....41
2.2B.4	Lead levels in the air of Chiang Mai City and the air quality standards .....49
2.2B.5	The average lead level in the air of roadside in urban area and control sites.....49
2.2B.6	SPMs level in the air of Chiang Mai City and the air quality standards .....49
2.2B.7	The average SPMs level in the air of roadsides in Chiang Mai City and control sites.....49
2.2B.8	Compare lead level in air of Chiang Mai City in 1995 with Chiang Mai and Bangkok in 1993.....51
2.2B.9	Compare SPMs level in air of Chiang Mai City in 1995 with Chiang Mai and Bangkok 1993.....51
2.2B.10	Compare the monitoring lead using mask filters and High Volume Air Sampler.....51
2.2B.11	Compare the monitoring SPMs using mask filters and High Volume Air Sampler.....51
2.2B.12	The lead levels in the air and rainfall amount in different month.....53

2.2B.13	The lead levels in the air during May -July and September - December and rainfall amount.....	53
2.2B.14	The SPMs levels in the air and rainfall amount in different month.....	53
2.2B.15	The SPMs levels in the air during May -July and September -December and rainfall amount.....	53
2.2B.16	SPMs levels and construction (1st time) .....	55
2.2B.17	SPMs levels and construction (2nd time).....	55
2.2B.18	Lead levels and traffic volume.....	55
