

Appendix

Appendix A

Informed Consent to Parents

Researchers are going to ask ill children to complete a questionnaire to determine how they perceive themselves. Questionnaire takes 20 minutes to complete. It includes 80 yes-no items of simple statement about attitude and value towards self. The child will just check " / " at the place of "yes" for items accordance with his own status, check "/" at the place of "no" for items inaccordance with his own status. No names will be used.

The information will help nurses and others to plan appropriate nursing care for these ill children.

Participation of the study is voluntary. There will be no penalty if you decide not to allow your child to participate. Withdrawal from this study at any time, even after the child starts to answer the questions, will not affect you or the child in any way.

Your child's name will remain confidential. Publications that result from the study will not identify individual children.

Thank you for your cooperation. If you agree to participate, please sign this form.

Informed Consent to Children

I am a nurse who is interested in finding out how hospitalized children like your age perceive themselves. I would like you to complete the questionnaire. It will take you about 20 minutes. It includes 80 yes-no items of simple statement about attitude and value towards self. Please check " / " at the place of "yes" for items accordance with your status, and " / " at the place of "no" for items inaccordance with your status. No names will be used.

The information will help us to understand how children like you feel about yourself and help you to recover quickly.

You are voluntary to participate in this study. Your name will remain confidential. Would you be willing to help me?

Thank you for your cooperation. If you agree to participate, please sign this form.
