ACKNOWLEDGEMENTS

I wish to express my sincere appreciation and high regard for Assistant Professor Dr. Seepan Kantawang, my major thesis advisor, for her extraordinary help and guidance and careful attention in all aspects of the study. I am very grateful to have had the opportunity to study under her guidance. Appreciation is also given to Associate Professor Wanwilai Chumpirom, co-advisor, Assistant Professor Dr. Ratanawadee Chontawan, academic advisor of this study, for their guidance and assistance. Meanwhile, I gratefully acknowledge help and support provided by Professor Yang Yin-hua, Dean of Faculty of Nursing, Shanghai Medical University, Professor Su Zu-you from Xi'an Medical University, and Associate advance nurse Xu Jing-yi, Head of Pediatric Nursing Department, Shanghai Children's Hospital. Very special thanks is extended to my parents and husband for their great support and understanding of my study. Finally, the appreciation is also given to China Medical Board of New York for providing financial support for this study.
