reviewing my research instruments and gave me much support. I appreciate Professor Qiu, Xiaoyang, and Professor Chang, Qing for their validation of the Chinese translation of my research instrument.

The China Medical Board of New York Inc. is acknowledged for providing financial support throughout the program.

I extend my appreciation to all staff in the Faculty of Nursing of Chiang Mai university, Xi'An medical University, and my home University; the personnel in the hospital where this study was conducted, and women who participated in my study for their willingness to share information. Without their support my study would not have been successful.

My special thanks go to my family: my parents, my husband, my son, and my sisters, for their constant love, support and encouragement they had given me. They would be proud.
