ACKNOWLEDGEMENTS

I would like to express my sincere gratitude to the members of the supervisory committee and the faculty members of this Department of Pharmacology for their support throughout my graduate study.

Special gratefulness to Dr. Wittaya Tonsuwonnont for his valuable guidance in the research methodology which has enabled me to carry on my study successfully.

My deep appreciation is for Dr. Sukanya Kanthawatana, my mentor, for her valuable guidance on the research plan, data analysis, and the thesis work, and also for her dedication, encouragement and kindly support throughout my graduate study.

I am also very grateful to Dr. Maleeya Manorot for her encouragement and support in medical care for the volunteers in this study and Assistant Prof. Dr. Chaichan Sangdee for his support of the research project.

My sincere thank is also extended to all volunteers in my research work and to my family for their love, understanding, and support, during this educational experience.

Finally, I would like to express my deep gratitude to my God, Jesus Christ who is my life with out him, this thesis would not have been possible.
