LIST OF TABLES

TABLE		PAGE
1.	Percentage of incidence of hypothermia-induced ventricular fibrillation (VF) in Control, Lidocaine-treated and Bretylium-treated groups.....	22
2.	The mean durations of hypothermia-induced ventricular fibrillation (VF) in Control, Lidocaine-treated and Bretylium-treated groups.....	24
3.	The mean body temperatures of hypothermia-induced ventricular fibrillation (VF) in Control, Lidocaine-treated and Bretylium-treated groups.....	27
4.	The mean serum potassium concentrations at three levels of body temperature in three groups of non-ventricular fibrillating animals.....	29
5.	The mean serum potassium concentrations at three levels of body temperature in three groups of ventricular fibrillating animals.....	37
6.	The mean serum glucose concentrations at three levels of body temperature.....	51

LIST OF ILLUSTRATIONS

FIGURE	PAGE
1. An example of EKG standard limb lead II of hypothermia-induced ventricular fibrillation in rat.....	21
2. Comparison of the percentage of the incidence of hypothermia-induced ventricular fibrillation among control and both of the chemical-treated rats.....	23
3. Comparison of the mean ventricular fibrillation durations among control and both of the chemical-treated rats.....	25
4. Comparison of the mean body temperature of ventricular fibrillating rats among control and both of the chemical-treated rats.....	28
5. Serum potassium concentrations at three levels of body temperature in non-ventricular fibrillating control rats.....	30
6. Serum potassium concentrations at three levels of body temperature in non-ventricular fibrillating Lidocaine-treated rats.....	31
7. Serum potassium concentrations at three levels of body temperature in non-ventricular fibrillating Bretylium-treated rats.....	33
8. Serum potassium concentrations at Normothermia in non-ventricular fibrillating rats.....	34
9. Serum potassium concentrations at 25°C in non-ventricular fibrillating rats.....	35
10. Serum potassium concentrations at 10°C in non-ventricular fibrillating rats.....	36

FIGURE	PAGE
11. Serum potassium concentrations at three levels of body temperature in ventricular fibrillating control rats.....	38
12. Serum potassium concentrations at three levels of body temperature in ventricular fibrillating Lidocaine-treated rats.....	39
13. Serum potassium concentrations at three levels of body temperature in ventricular fibrillating Bretylium-treated rats.....	41
14. Serum potassium concentrations at Normothermia in ventricular fibrillating rats.....	42
15. Serum potassium concentrations at 25°C in ventricular fibrillating rats.....	43
16. Serum potassium concentrations at the onset of ventricular fibrillation in ventricular fibrillating rats.....	44
17. Comparison of the mean serum potassium concentrations at Normothermia and 25°C in control rats.....	45
18. Comparison of the mean serum potassium concentrations at Normothermia and 25°C in Lidocaine-treated rats.....	46
19. Comparison of the mean serum potassium concentrations at Normothermia and 25°C in Bretylium-treated rats.....	47
20. Comparison of the mean serum potassium concentrations at three levels of body temperature among three groups of non-ventricular fibrillating rats.....	48
21. Comparison of the mean serum potassium concentrations at three levels of body temperature among three groups of ventricular fibrillating rats.....	49
22. Comparison of the mean serum glucose concentrations at three levels of body temperature between non-ventricular fibrillating and ventricular fibrillating rats.....	52
