ACKNOWLEDGEMENT

I would like to express my extreme gratitude to my advisor, Associate Professor Dr. Udom Boonayathap, the Head of Department of Physiology, for his constant supervision, guidance and encouragement throughout the period of my graduate study.

I wish to extend my deep appreciation and gratitude to my co-advisor, Assistant Professor Dr. Chucheepp Praputpittaya for his helpful advice, comments, continuous encouragement and suggestions. This thesis could not have been accomplished without his understanding and gracious assistance.

I am also deeply grateful to Dr. Anchalee Pongchaidecha and Associate Professor Vallapa Anantasan my thesis committee, for their valuable comments, suggestions and corrections of this thesis.

Special thanks to Professor Robert L. Hazelwood, staff of Department of Biology, Program in Physiology, University of Houston, U.S.A., for his kind assistance, useful suggestions and correction of this thesis.

Sincerely thankful to Mr. Terdsak Chaiwana, medical technologist, Clinical chemistry laboratory, Central diagnostic laboratory, Maharaj Nakorn Chiang Mai hospital for his kindness and helpful service of the chemical analysis of serum potassium levels.

I would like to thank all the members of the Physiology Department, Faculty of Medicine, Chiang Mai University for their kindness and instruction.

Finally, I especially wish to express my heartfelt thanks to my parents and family for their love, kindness, support and encouragement throughout my life.
