ACKNOWLEDGMENT

The author would like to express her sincere appreciation and gratitude to her supervisor, Mr. Phrek Gypmantasiri for his generous support, advises, recommendations and guidance at various stages of her studies. The author would like to extend the appreciation and gratitude to the examining committee members, Assist. Prof. Dr. Ampan Bhromsiri, Assist. Prof. Dr. Soothorn Buranawiriyakul and Assoc. Prof. Suthat Julsrigivan, for their guidance, valuable comment and suggestions.

Further, the author is also grateful and would like to thank the lecturers and administrative staff of Agricultural Systems Program, Faculty of Agriculture, Chiang Mai University for sharing their knowledge and experience during the study. Sincere thanks are also extended to all the staff in soil micro-biology lab and to the farmers at Ban Kae Noi, for their cooperation and sincerity in answering the survey questionnaire and thereby making the study possible. The author also would like to thank Mr. Pan Pankao and Ms. Supavadee Sompak for their generous help in conducting the field work. Special thanks goes to Ms. Suporn Amarueckachoke and Ms. Somchit Opastrakul for their generous help and suggestions for research work. The author is also grateful for the friendship and warm relationship provided by all AGS friends 1992-1997 batch during her graduate study.

Finally, the author is thankful with all gratitude to her parents and brothers for their understanding, patience, sacrifices and encouragement which are the source of inspiration and motivation behind to complete her study in Chiang Mai University.
