	Page
ACKNOWLEDGMENTS	i
ABSTRACT	iii
TABLE OF CONTENTS	vii
LIST OF TABLES	x
LIST OF FIGURES	xi
 Chapter 1 INTRODUCTION	 1
Chapter 2 LITERATURE REVIEW	4
2.1 Fruit Quality of Apple	4
2.2 Boron Uptake by Plant	5
2.3 Redistribution of Boron in Plant	5
2.4 Role of Boron in Plant	7
2.5 Plant Analysis	9
2.6 Boron Requirement in Fruit Tree	11
Chapter 3 MATERIALS AND METHODS	12
3.1 Field Experiment	12
3.2 Field Survey	16
3.3 Data Analysis	17
Chapter 4 RESULTS AND DISCUSSION	18
4.1 Field Experiment	18
4.1.1 Responses to Boron Fertilizer	18
4.1.1.1 Shoot Length	18
4.1.1.2 Fruit Drop	19
4.1.1.3 Fruit Size	20
4.1.1.4 Yield and Yield Components	21
4.1.1.5 Fruit Quality	22
4.1.1.6 Seed Number per Fruit	23

4.1.1.7	Tissue Boron Concentration	23
A	Boron Concentrations in Plant Parts before Imposing Boron Treatment	23
B	Boron Concentrations in Plant Parts after Imposing Boron Treatment	24
B.1	Shoot Boron Concentration	24
B.2	Leaf Boron Concentration	26
B.3	Fruit Boron Concentration	27
B.4	Boron Concentrations in Retained and Dropped Fruit	28
B.5	Boron Concentrations in Fruit Parts	29
4.1.2	Prognosis	30
4.1.2.1	The Relationships between Yield or Fruit Total Sugar at Harvest and Leaf Boron Concentration at 4 weeks after Full Bloom	30
4.1.2.2	The Relationships between Yield or Fruit Total Sugar at Harvest and Fruit Boron Concentration at 4 weeks after Full Bloom	33
4.1.3	Diagnosis	35
4.1.3.1	The Relationships between Yield or Fruit Total sugar and Leaf Boron Concentration at 20 Weeks after Full Bloom (harvest)	35
4.1.3.2	The Relationships between Yield or Fruit Total sugar and Fruit Core Boron concentration at 20 Weeks after Full Bloom (harvest)	37
4.1.3.3	The Relationships between Yield or Fruit Total sugar and Fruit Boron Concentration at 20 Week after Full Bloom (harvest)	37
4.1.4	Effect of Storage Time and Low temperature on Fruit Quality	40
4.1.5	Economic Benefit	41
4.2	Field Survey	42
4.2.1	Fertilizer Management in Apple Orchard in Yunnan	42
4.2.2	The Relationships between Weight, Length, Diameter, Firmness Soluble solids of Fruit or Seed number per Fruit and Leaf Boron Concentrations at Harvest	42
4.2.3	The Relationships between Weight, Length, Diameter, Firmness, Soluble solids of Fruit or Seed number per Fruit and Fruit Boron Concentrations at Harvest	43
4.2.4	Distribution and Severity of Boron Deficiency in Apple Growing Areas in Yunnan	46

Chapter 5	GENERAL DISCUSSION	48
5.1	Effect of Boron on Seed Number and Fruit size	48
5.2	Effect of Boron on Fruit Yield and Its Quality	49
5.3	Selection of Plant Part for Diagnosis of Boron Deficiency in Fruit	51
Chapter 6	CONCLUSION	53
REFERENCES		55
APPENDICES		62
Appendix A	Layout of Field Experiment	63
Appendix B	Field Experimental Results	64
Appendix C	Analysis of Variance (ANOVA) of Field Experiment	71
Appendix D	Characteristics of 60 Apple Leaf and Fruit Samples Collected at Harvest from Surveyed Orchard , Yunnan 1996	72
Appendix E	Procedures of Tissue Boron Concentration Analysis	73
CURRICULUM VITAE		75

LIST OF TABLES

Table	Page
4.1 Effect of borax application on shoot length in Golden Delicious apples	18
4.2 Effect of borax application on percentage of abscised fruit during fruit dropping time in Golden Delicious apples	19
4.3 Effect of borax application on fruit length (cm) and fruit diameter (cm) in Golden Delicious apples	20
4.4 Effect of borax application on time when the skin color of 50% of fruit surface changed from green to yellow in Golden Delicious apples, fruit weight, number of fruit per tree and fruit yield	21
4.5 Effect of borax application on firmness, total sugar (TS), soluble solids (SS), titratable acidity (TA), vitamin C (V.C) and number of seed per fruit in Golden Delicious apples at harvest	22
4.6 Boron concentrations (mg kg^{-1} dry wt.) in flower, youngest open leaf and young shoot in Golden Delicious apples at five days before borax application	23
4.7 Effect of borax application on boron concentrations (mg kg^{-1} dry wt.) in retained and dropped fruit at pea-size drop, June drop and pre-harvest drop in Golden Delicious apples	28
4.8 Effect of storage time and temperature on fruit quality of Golden Delicious apple trees supplied with 160 g borax per tree	40
4.9 Economic consideration of different treatments	41
4.10 Types of fertilizer management in Zhaotong, Lijiang and Kunming orchards	43
4.11 Leaf boron concentrations in three surveyed areas at harvest	46

LIST OF FIGURES

Figure		Page
1.1	The map of fruit distribution in Yunnan	3
2.1	The relationship between growth and nutrient concentration in plant	10
4.1	Effect of borax application on boron concentrations in shoots (a), youngest fully expanded leaves (b) and fruit (c) in Golden Delicious apples	25
4.2	Rainfall in Dabaiqiao Horticultural Farm, Kunming in 1996	26
4.3	Boron concentrations in skin, outer cortex, inner cortex, core and whole fruit in Golden Delicious apples at harvest	30
4.4	The relationships between yield (a) or fruit total sugar (b) at harvest and leaf boron concentrations at 4 weeks after full bloom	32
4.5	The relationships between yield or fruit total sugar at harvest and fruit boron concentrations at 4 weeks after full bloom	34
4.6	The relationships between yield or fruit total sugar and leaf boron concentrations at 20 weeks after full bloom (harvest)	36
4.7	The relationships between yield or fruit total sugar and fruit core boron concentrations at 20 weeks after full bloom (harvest)	38
4.8	The relationships between yield or fruit total sugar and fruit boron concentrations at 20 weeks after full bloom (harvest)	39
4.9	The relationships between fruit weight (a), diameter (b), length (c), seed number per fruit (d), firmness (e) or soluble solids (f) and leaf boron concentrations at harvest.	44
4.10	The relationships between fruit weight (a), diameter (b), length (c), seed number per fruit (d), firmness (e) or soluble solids (f) and fruit boron concentrations at harvest.	45
