ACKNOWLEDGEMENT

The author would like to express her gratitude and appreciation to Professor Torpong Sanguansermisri for his guidance and suggestions throughout the study. Without his support and encouragement this thesis would not have been successful.

She would like to extend her gracious thank to Dr. Heinrich F. Steger, thesis co-adviser, for his excellent guidance, training, as well as for major and thorough corrections of this thesis.

She would like to extend her gracious thank to Assistant Professor Dr. Prachya Kongtawelert, Department of Biochemistry, thesis co-adviser, for his guidance, valuable suggestions and corrections of this thesis.

She would like to thank all the faculties in the Department of Biochemistry, Human Genetics Unit, Faculty of Medicine, for their instruction and training. Their teaching and suggestions during the course work were very helpful for the understanding of this study.

She would like to express her thank to Mrs Areerat Panyakiao, for her kind help in keeping blood samples and take care her laboratories.

She would like to thank their friends in her laboratory for their kindness and friendship.

Finally, she would like to express her deepest gratitude to her parents and Mr. Direk Mungkung for their love, understanding and encouragement throughout the study.
