Abstract in Thai vii

List of Tables xiii

List of Figures xv

Chapter 1 . Introduction..... 1

Chapter 2. Literature Review..... 5

2.1 Use of Macroinvertebrates as bioindicators..... 5

2.2 Macroinvertebrates sampling methods..... 11

2.3 Type of Artificial substrates use for sampling freshwater benthic macroinvertebrates..... 13

2.4 Advantages and disadvantages of artificial substrate samplers..... 16

2.5 Data analysis 22

Chapter 3. Site description 25

Chapter 4. Materials and methods 34

4.1 Artificial substrate samplers 35

4.1.1 Setting of artificial substrate samplers 37

4.1.2 Retrieving of artificial substrate samplers and processing..... 38

4.2 Conventional samplers 40

4.3 Sorting and identification 41

4.4 Colonization curve 42

4.5 Data analysis 43

Chapter 5. Results 51

5.1 Missing data 51

5.2 Available colonization area of ASS 51

5.3 Abundance and taxon richness of macroinvertebrates in sampling methods 51

5.4 Abundance of animals per site using different sampling methods.. 52

5.5 Coefficient of variance in ASS 55

5.6 Data transformation 56

5.7 Taxa richness in ASS 64

5.8 Taxonomic composition of macroinvertebrates in ASS 66

5.9 Taxonomic composition of macroinvertebrates in ASS According to sites..... 70

5.10 Artificial substrate preference by macroinvertebrates 74

5.11 Colonization sequence in ASS..... 74

5.12 Effect of increased water level and velocity on abundance of macroinvertebrates in ASS 78

5.13 Natural substrate preference by macroinvertebrates 78

5.14 Macroinvertebrates found in different substrate types and seasons according to sampling sites..... 81

5.15 Taxa richness according to substrate type and season 81

5.16 Composition of macroinvertebrates in different substrates 85

5.17 Evaluation of water quality using Rapid Bioassessment Protocol II (RBP II) based on macroinvertebrates found in WB sampler and conventional methods 86

5.17.1 Application of RBP (II) for macroinvertebrates Collected from the ASS and conventional methods .. 86

5.18 Clustering of macroinvertebrate families found in WB sampler and conventional methods 92

Chapter 6. Discussion 99

Chapter 7. Conclusions and Recommendations 109

References 111

Appendices .....

Appendix A 120

Appendix B 122

Appendix C 124

Appendix D 135

Appendix E 143

Curriculum Vitae..... 147

List of Tables

		Page
Table 1	Sampling sites, altitude and corresponding codes.....	25
Table 2	Physical and chemical parameters of the study sites.....	27
Table 3	Types of sampling methods and their relevant codes	34
Table 4	Quality points range for each score.....	49
Table 5	Quality points range for the final classification of sites.....	50
Table 6	Mean number of animals per m^2, total number of families per unit sampler in each sampling methods and families common to all sampling sites	52
Table 7	Coefficient of variance in artificial substrate sampler and conventional methods for two seasons.....	55
Table 8	Values of Levene test for homogeneity of variance for untransformed data and different transformation methods calculated for independent variables.....	57
Table 9	Mean number of animals /m^2, and 95 % upper and lower confidence limits per sampling methods irrespective of sites and seasons.....	63
Table 10	Mean number of animals /unit sampler, and 95 % upper and lower confidence limits per sampling methods irrespective of sites and seasons.....	63
Table 11	Mean number of families per unit sampler, and 95 % confidence limits recorded from study sites irrespective to sampling methods and season.	66
Table 12	Mean number of animals/m^2 in different sites, substrates and seasons...	80
Table 13	Results of the various indices for the wooden box sampler (dry season).....	86
Table 14	Results of the various indices for the wooden box sampler (wet season).....	87
Table 15	Results of the various indices for the conventional methods (dry season).....	88

Table 16 Results of the various indices for the conventional methods (wet season)..... 88
Table 17 Water quality scores for the Wooden box sampler (dry season)..... 89
Table 18 Water quality scores for the Wooden box sampler (wet season)..... 90
Table 19 Water quality scores for the conventional methods (dry season)..... 91
Table 20 Water quality scores for the conventional methods (wet season)..... 91
