ACKNOWLEDGMENTS

A piece of research is never an achievement of an individual . This is certainly true in the case of a Masteral thesis. To me, this research was an effort of hard work, care and concern of many. I wish to express my heartfelt gratitude to all those who devoted their time and energy and making it possible for me to complete this thesis.

First of all my deep appreciation goes to Dr. Porn-tip Chantaramongkol, my thesis supervisor, for her guidance, encouragement, provision of reading materials and suggestions for improvements through out the entire thesis work. I acknowledge with deep gratitude the invaluable contribution made by Assoc. Prof. Dr. Arayar Jatisatienr my thesis co-advisor, for her assistance in data analysis with SPSS/PC and for providing invaluable direction for required reference materials. My appreciation also goes to Assoc. Prof. Dr. Kate Grudpan, committee member in the thesis defense, for providing me with valuable comments for improvement.

I wish to thank the GTZ, Saarland University, Germany, ERA staff in Chiang Mai University for making it possible for me to follow the course through financial support. I gratefully acknowledge the Chairman of the ERA program for his kindness and support during the two year periods of stay in Chiang Mai University.

I would like to thank Dr. D.M. Rosenberg for his contribution of valuable references and I am also grateful to Prof. Dr. Roger A. Beaver for his patient reading, and critically commenting on the manuscript and suggesting improvements. I would like to thank Miss Anne Kurian for her patient manuscript reading and suggesting improvements. A special thanks goes to Dr. (Mrs.) N. J . De S. Amarasingha for her sincere effort and encouraging me to take up further studies.

I also acknowledge the support of Assist. Prof. Dumrong Ratanapruk for guiding me in the site selection. I sincerely thank Ms. Manasa Napathalung and Mr. H.K. Rathnadeera for their support particularly in the field works. My deep felt thanks also goes to my batch mates, Nilo (Philippines), Kafle (Nepal), Luo (China), Monyrak (Cambodia), Nanette (Philippines), Lita (Philippines), Anh (Vietnam) Siriporn (Thailand) and Wang (China), for providing supportive and happy environment, which helped in breaking the monotony.

I am particularly grateful for my parents, brothers and sister, for their many sacrifices, and encouragement across the seas which gave me the determination to complete my studies. Finally, my very special gratitude goes to my wife Renuka and son Kavinda, for their love, great encouragement and patiently waiting for a long time to see my success. Without their support and encouragement this success would not be possible.

W. A. H. P. GURUGE.
