Acknowledgements	III
Abstract (in English)	V
Abstract (in Thai)	VII
Table of Contents	IX
List of Tables	XI
List of Illustrations	XII
 <b>Chapter 1    Introduction</b>	 <b>1</b>
1.1 Late Cenozoic Basalts in Thailand	1
1.2 Mae Tha Basalt	5
1.2.1 Location	5
1.2.2 Accessibility	5
1.2.3 Physiographic Description	7
1.2.4 Previous Work	7
1.3 Purpose of Study	9
 <b>Chapter 2    Geologic Setting</b>	 <b>10</b>
2.1 Permo-Triassic Volcanic Rocks	10
2.2 Triassic Sedimentary Rocks	12
2.3 Tertiary Sedimentary Rocks	14
2.4 Quaternary Basalts and Sediments	14
2.4.1 Quaternary basalts	14
2.4.2 Quaternary sediments	15
 <b>Chapter 3    Occurrence and Petrography</b>	 <b>16</b>
3.1 Occurrence	16
3.2 Petrographic Study	21

<b>Chapter 4</b>	<b>Geochemistry</b>	44
	4.1 Sample Preparation	44
	4.2 Analytical Techniques	44
	4.3 Magmatic Affinities and Rock Types	45
	4.4 Major and Minor Oxides	46
	4.5 Trace Elements	50
	4.6 Multi-element Patterns	53
	4.7 Chemical Stratigraphy	57
<b>Chapter 5</b>	<b>Petrogenesis</b>	62
	5.1 Primary Magma vs Derivative Magma	62
	5.2 Experimental Constraint	63
<b>Chapter 6</b>	<b>Discussion and Conclusion</b>	68
	6.1 Occurrence and Petrography	68
	6.2 Chemical Characteristic	69
	6.3 Origin	70

	Appendix E	119
Curriculum Vitae		124

## LIST OF TABLES

Table		Page
1	Absolute ages of the Late Cenozoic basalts in Thailand.	4
2	Locations of the Mae Tha basalt with attitudes of platy joints and thicknesses of individual flows.	20

## LIST OF ILLUSTRATIONS

Figure		Page
1	Distribution of Late Cenozoic basalts in Thailand.	2
2	Topographic map of the study area.	6
3	National and provincial highways, and location of the study area.	8
4	Simplified geologic map of the study area showing the distribution of Mae Tha Basalt.	11
5	Map showing boundaries and sample locations of the Mae Tha basalt presented in this study.	17
6	<i>In situ</i> float of the Mae Tha basalt at grid reference 622159.	18
7	Thinly baked contact between the upper and lower basaltic flows at grid reference 661044.	18
8	Exposure of the Mae Tha basalt on the cliff at grid reference 736179 showing columnar joints.	19
9	Exposure of a basalt flow at grid reference 719145 showing columnar and platy joints.	19
10	Outcrop of the pillow lava at grid reference 736180.	22
11	Basalt pillows with ropy and wrinkled surfaces at grid reference 739180.	22
12	Outcrop of basalt with columnar joints and poorly developed platy joints at grid reference 719145.	24
13	Photomicrograph of sample no. MT 10/2 showing olivine phenocrysts with rounded edges, sitting in hypocrySTALLINE groundmass.	24

### XIII

Figure	Page
14 Photomicrographs of sample no. MT 21 displaying a sieve-textured olivine phenocryst with embayment features, and felty groundmass.	25
15 Photomicrographs of sample no. MT 11 illustrating an olivine glomerocryst and felty hypocrystalline groundmass.	26
16 Photomicrographs of a microphyric basaltic rock (sample no. MT 24) showing microphenocrysts of sieve-textured euhedral olivine, and opaque minerals that are embedded in felted hypocrystalline matrix.	27
17 Photomicrograph of a microphyric basalt (sample no. MT 17) displaying microphenocrysts of olivine and opaque minerals that are embedded in felted groundmass.	28
18 Photomicrograph of a microphyric basalt (sample no. MT 19) showing olivine microphenocrysts and trachytic groundmass.	28
19 Photomicrograph of sample no. MT 24 illustrating isolated anhedral and euhedral olivine microphenocrysts and an olivine glomerocryst. Also shown are chromian spinel (?) inclusions in olivines.	29
20 Photomicrographs of sample no. MT 1/F displaying an euhedral clinopyroxene microphenocryst with opaque inclusions.	30
21 Photomicrographs of a microphyric basalt (sample no. MT 8) showing microphenocrysts of olivine and clinopyroxene that are embedded in hypocrystalline groundmass.	31
22 Photomicrographs of sample no. MT 13 illustrating amygdale calcites, and amygdale and fracture-infilling zeolites.	32
23 Photomicrographs of sample no. MT 25 showing olivine microphenocrysts and glomerocrysts with chromian spinel (?) inclusions.	33

Figure		Page
24	Photomicrographs of sample no. MT 9 displaying a clinopyroxene microphenocryst with stellate fashion in felted hypocrystalline groundmass.	34
25	Photomicrographs of sample no. MT 1/D showing a plagioclase microphenocryst with clinopyroxene inclusions.	35
26	Photomicrographs of sample from chill margin of basalt pillow (sample no. MT 14/2) displaying olivine and plagioclase microphenocrysts in glassy matrix.	36
27	Photomicrographs of sample no. MT 10/2 illustrating a quartz xenocryst with reaction corona made up of diopside crystals.	38
28	Photomicrographs of a Permo-Triassic (?) volcanic xenolith with reaction rim of diopside aggregate.	39
29	Photomicrographs of sample no. MT 1/E displaying glass and quenched crystals.	40
30	Photomicrographs of sample no. MT 5/1 showing groundmass plagioclase and clinopyroxene with stellate fashion.	42
31	Alkali versus silica plot for the analyzed Mae Tha basalts.	47
32	MgO variation diagrams for $\text{SiO}_2$ , $\text{TiO}_2$ , $\text{Al}_2\text{O}_3$ and $\text{FeO}^*$ in the Mae Tha alkalic basalts.	48
33	MgO variation diagrams for $\text{MnO}$ , $\text{CaO}$ , $\text{Na}_2\text{O} + \text{K}_2\text{O}$ and $\text{P}_2\text{O}_5$ in the Mae Tha alkalic basalts.	49
34	MgO variation diagrams for Ba, Rb, Sr and Y in the Mae Tha alkalic basalts.	51

Figure		Page
35	MgO variation diagrams for Zr, Ni, V and Cr in the Mae Tha alkalic basalts.	52
36	Tectonic discrimination diagrams in terms of Ti and V, and Ti/Y and Nb/Y for the Mae Tha basalts.	54
37	Nb-Zr-Y diagram for the analyzed Mae Tha basalts.	55
38	Chondrite-normalized REE patterns for the representative Mae Tha basalts compared with those of the alkalic basalt from southern part of Gregory rift, Kenya.	56
39	N-MORB normalized multi-element diagram displaying the patterns for representative Mae Tha basalts compared with those of the alkalic basalt from southern part of Gregory rift, Kenya.	58
40	Major- and minor-oxide variation diagrams as a function of elevation above a mean sea level for the Mae Tha basalts penetrated in the drill hole at Ban Huai Rak Mai.	59
41	Trace-element variation diagrams as a function of elevation above a mean sea level for the Mae Tha basalts penetrated in the drill hole at Ban Huai Rak Mai.	60
42	P-T diagrams for partial melting of enriched mantle source and depleted mantle source.	65
43	Petrogenetic grid for mantle-derived basalt magmas.	66
