## ACKNOWLEDGEMENTS

I want to extend my sincere gratitude to my advisor, Lecturer Duangsamorn Charuchinda for her supervision, invaluable guidance and proof of this thesis.

I am indebted to Assistant Professor Aunnop Koonphandh, the Educational Measurement and Evaluation Department of Faculty of Education, and Lecturer Peerasak Malikaew, the Community Department of Faculty of Dentistry for their reliable advices in the design and interpretation for the statistical analysis. I would also like to thank Lecturer Piyanart Juntarachotivit, the Community Department of Faculty of Dentistry for her valuable suggestions in the statistical analysis.

I am also wish to express my thanks to staffs at the Orthodontic Department of Faculty of Dentistry, Chiang Mai University: Assistant Professor Sakda Apisariyakul, Lecturer Duangsamorn Charuchinda, Lecturer Sunitaya Chatkupt, Assistant Professor Aueporn Boondej, Assistant Professor Dhirawat Jotikasthira and Associate Professor Virush Patanapom; Lecturer Itchaya Sirinavin at Lampang Hospital and Lecturer Clark Lamberton, the Chiang Mai Dental Clinic of Seventh-day Adventists for permitting to use their lateral cephalograms throughout this research.

My special thanks will also be extended to the National Research Council of Thailand and Graduate School, Chiang Mai University for the financial support to this research.

Finally, my special gratitude is extended to my parents for their continuous encouragement.

With everlasting love and respect, I dedicate this thesis to my late grandmother and my parents, whose strength, support and unending love have greatly inspired my life.
