ACKNOWLEDGEMENT

The author is greatly indebted to the Department of Mineral Resources (DMR) for providing essential financial support and enabling him to work on this project.

Great appreciation must be expressed to Dr. Pisanu Wongpornchai, the supervisor, for his constructive suggestions and critical reading manuscript of this report. Sincere appreciation is expressed to Associate Professor Dr. Theerapongs Thanasuthipitak and Professor Dr. Kittichai Wattananikorn for their guidance and encouragement throughout the study.

The author is greatly thankful to Mr. Suvit Sampattavanich, Director of Economic Geology Division and Mr. Samai Chiemchindaratana, Chief of Marine Mineral Resources Section, Economic Geology Division, DMR, for their generous supports and encouragement, for providing base data and facilities to conduct the work.

Deep, sincere appreciation must be given to Mr. Aree and Mrs. Malai Chotikasathien, the author's father and mother, and Mrs. Ankarat Chotikasathien, the author's wife, for their patient encouragement and great supports.

Special thanks must be given to Mr. Thawatchai Tepsuwan, a senior marine geophysicist, DMR, for his constructive and applicable suggestions in

seismic interpretation. The author would like to express his gratitude to Mr. Wichien Intasen, a marine geologist, for his comments on seismic interpretation, lithofacies interpretation and sealevel study. His efforts in correcting the manuscript and suggesting necessary modifications, are also highly appreciated. Sincere thanks must be given to Mr. Rungsiroj Vongpromek, Mr. Tawan Sukko, Mr. Chote Trachu, Mr. Suvit Seritrakul, Mr. Yongyuth Chattrapakpong, Mr. Somchai Rujajaruswong, Mr. Pramuan Kohpina, Mr. Peerawut Tansakul, Mr. Somsak Wattanaprida, and Miss Darunee Saisuthichai for their favorable assistance in gathering data and constructive advice for the study.

Grateful acknowledgement must also be given to Mr. Kiattichai Tulathammakul, Senior Geologist, Mineral Resources Region 3, Chiang Mai for his kind supports of computer facilities, transport when the author stayed and prepared the manuscript in Chiang Mai.

The author is thankful to Mr. Montri Sriburin and Mrs. Tippawan Sritabutra for thier assistance in figures preparation, and to Miss Apinya Pookpanich for her help in preparing and typing tables of drill log data.

In addition, the author is thankful to all colleagues and his superiors who are not named but involved in this study.

Wisut Chotikasathien
