

## TABLE OF CONTENTS

	PAGE
ACKNOWLEDGMENTS	iii
ABSTRACT IN ENGLISH	iv
ABSTRACT IN THAI	vi
LIST OF TABLES	x
LIST OF FIGURES	xi
CHAPTER 1 INTRODUCTION	1
1.1 Statement and significance of the problem	1
1.2 Literature review	1
1.3 Objectives	7
1.4 Area and Method of study	7
1.4.1 Geology of the study area	7
1.4.2 Measuring station	13
1.4.3 Method of study	14
CHAPTER 2 THEORY	15
2.1 Earthquakes and Radon	15
2.2 Movement of Radon in Overburden	16
2.3 The mathematical model used to distinguish the variation of radon concentration due to meteorological factors from the total radon anomaly	22

---

CHAPTER 3 MEASURING METHOD AND RESULTS	28
3.1 Field Measurement	28
3.2 Laboratory Measurement	39
CHAPTER 4 ANALYSIS AND PROCESSING	41
4.1 The relationships between meteorological parameters and soil gas radon concentrations	41
4.2 Data processing of soil gas radon	45
4.3 Comparison of radon anomaly and earthquakes data	49
CHAPTER 5 DISCUSSION AND CONCLUSION	55
REFERENCES	57
APPENDIX A	60
APPENDIX B	80
CURRICULUM VITAE	87

**LIST OF TABLES**

<b>Table</b>		<b>Page</b>
3.1	The criteria used for selecting earthquakes during this study	31
3.2	Radon concentration of soil samples	40
A1	Radon concentration at 50-cm depth	61
A2	Radon concentration at 100-cm depth	63
A3	Meteorological data	65
A4	Earthquakes selected from total occurrences using criteria shown in Table 3.1	75
A5	Number of earthquakes selected	77
A6	Input data used in M program	78

## LIST OF FIGURES

Figure	Page
1.4.1a Location map of the study area	9
1.4.1b Geological map of the study area	10
1.4.1c Legend	11
1.4.1d Lineament pattern of the Northern Thailand region and Tertiary sediment Basin	12
1.4.2 Station locations	13
2.2a An infinite source with overburden	17
2.2b An infinite source with three layers	20
2.3 The sequence of mathematical model used for processing soil gas radon	27
3.1a Schematic diagram of a soil gas radon detector	29
3.1b Equipment used to etch film	29
3.1c Illustrated picture on screen of color TV	30
3.1d Times series of radon concentration at 50-cm depth	32
3.1e Times series of radon concentration at 100-cm depth	33
3.1f Times series of soil temperature	34
3.1g Times series of barometric pressure	35
3.1h Times series of rainfall	36
3.1i Daily earthquakes selected, from 29 September 1996 to 5 July 1997	37

3.1j	Historical seismicity during 1977-1996, and selected earthquakes during the period of 29 September 1996 to 5 July 1997	38
3.2	Equipment used to measure emanations from a soil sample	39
4.1a	Average radon concentration at two depths	42
4.1b	Average soil temperature at two depths	43
4.1c	Average barometric pressure and precipitation	44
4.2a	Outline of processing	46
4.2b	Calculated and observed radon time series at 50-cm depth	47
4.2c	Calculated and observed radon time series at 100-cm depth	48
4.3a	Calculated maximum distance vs magnitude	53
4.3b	Compare radon data and earthquakes from dislocation model of Fleischer	54
