

TABLE OF CONTENTS

	PAGE
ACKNOWLEDGEMENT	iii
ABSTRACT IN THAI	v
ABSTRACT IN ENGLISH	vii
LIST OF TABLES	xi
LIST OF ILLUSTRATIONS	xii
CHAPTER 1 INTRODUCTION	1
1.1 General	1
1.2 Concepts and purpose of the study	2
1.3 Study area	6
1.4 Literature review	8
CHAPTER 2 ELEMENTARY THEORY	14
2.1 Newton's law of gravity	14
2.2 Application to gravity survey	15
CHAPTER 3 GRAVITY DATA AND DATA REDUCTION	17
3.1 Data coverage	17
3.2 Gravity data reduction	19
3.3 Data enhancement	24
3.4 Qualitative interpretation	27
CHAPTER 4 GRAVITY MODELING	35
4.1 Introduction	35
4.2 Laboratory density determination procedures	36
4.3 Modeling of gravity profiles	38

4.3.1 Gravity model along profile A1A2	42
4.3.2 Gravity model along profile B1B2	44
4.3.3 Gravity model along profile C1C2	44
4.3.4 Gravity model along profile D1D2	47
4.3.5 Gravity model along profile E1E2	47
4.3.6 Gravity model along profile F1F2	50
CHAPTER 5 CONCLUSION AND RECOMMENDATION	53
5.1 Conclusion	53
5.2 Recommendation	55
REFERENCES	58
APPENDIX A Field gravity data (<i>.raw</i> files)	63
APPENDIX B Drilled hole data	83
CURRICULUM VITAE	94

LIST OF TABLES

TABLE	PAGE
1.1 Density data of rocks and minerals	3
3.1 Example of <i>raw</i> file format	23
3.2 Example of completed <i>raw</i> file format	23
3.3 Example of terrain correction values along line No. 32	24
4.1 Laboratory density measurements of core samples	38
4.2 Model's parameters and geological interpretation	41
5.1 Density of each subsurface rock units used for modeling	54

LIST OF ILLUSTRATIONS

FIGURE	PAGE
1.1 Cores from exploration well	4
1.2 Conceptual modeling of gypsum-anhydrite relationships and the gravity response	5
1.3 Index map of the study area	7
1.4 Topographic relief of the study area	9
1.5 Geologic map of gypsum producing area and location of the study area	10
1.6 Siam Cement gypsum mine located to the SW of the study area	11
3.1 Location of data collection	18
3.2 Schematic illustrations of procedures for data processing	20
3.3 Free-air anomaly map	25
3.4 Bouguer anomaly map	26
3.5 Gravity power spectrum	29
3.6 The bouguer anomaly map after applying upward continuation technique to an elevation of +1,000 m.	30
3.7 The bouguer anomaly map after applying low pass filter with wavenumber less than 0.41 cycle/km	31
3.8 The bouguer anomaly map after applying band pass filter with wavenumber between 0.41 cycle/km and 0.31 cycle/km	33
3.9 The bouguer anomaly map after applying second order vertical derivative filter	34

4.1 Gravity profiles	37
4.2 Dissiminated sulfide minerals in andesite (in circle) from borehole no. CD 10	40
4.3 Gravity model along profile A1A2	43
4.4 Gravity model along profile B1B2	45
4.5 Gravity model along profile C1C2	46
4.6 Gravity model along profile D1D2	48
4.7 Gravity model along profile E1E2	49
4.8 Gravity model along profile F1F2	51
5.1 Enhanced geologic map of the study area	57
