## Acknowledgements

The author would like to express his deep gratitude to a number of persons who have constantly provided assistance and guidance during the course of this research; Prof. Dr. Kittichai Wattananikorn, supervisor, for his encouragement as well as valuable suggestion to improve the manuscript, Mr. Adichat Surinkum, advisor, for providing field gravity data, geophysical instruments, and other innumerable items necessary during the field work as well as for his guidance during the review of this manuscript.

Assoc. Prof. Dr. Theerapongs Thanasuthipitak is highly appreciated for his valuable insights and critical reading of the manuscript. The author also gratefully acknowledges Mr. Cherdsak Utha-aroon, assistance advisor, for his advice on technical details on aspects of the gypsum deposits and his help in improving the quality of this thesis.

Mr. Pracha Kuttikul, senior geophysicist in the Department of Mineral Resources (DMR), is also thanked for several useful comments and critical reading of the manuscript. Special thanks are due to Mr. Sydney L. Rieb for his critical reading of part of the manuscript.

The author also wishes to express his appreciation to all the members of the highly co-operative and friendly geophysics team of Phichit whose dedicated help during field work is vitally important for the research. Particularly thanks to Mr. Jeerapong Sungkum, lab supervisor of applied geophysics program, for his help with computer

applications, Mr. Wanchat Rinvittayakorn for his assistance during laboratory density determination, and to Dr. Pornsawat Wathanakul for granting permission to use some of the facilities in her lab at Kasetsart University.
