ACKNOWLEDGEMENT	iii
ABSTRACT	v
LIST OF TABLES	ix
LIST OF FIGURES	xii
ABBREVIATIONS	xiv
I INTRODUCTION	1
II LITERATURE REVIEW	
II.1 Vitamin E	3
II.1.1 Chemistry of vitamin E	3
II.1.2 Source of vitamin E	5
II.1.3 Transportation and metabolism of vitamin E	6
II.1.4 Vitamin E determination	8
II.1.5 Vitamin E requirement of weaned pigs	8
II.2 Relationship of lipid and Vitamin E	
II.2.1 Lipid peroxidation	9
II.2.2 Lipid bilayer of cell membrane	12
II.2.3 Vitamin E protect lipid peroxidation	14
II.2.4 Lipid peroxidation influence immunity	14
II.3 Relationship of vitamin E and immunity	
II.3.1 An over view of immune system	15
II.3.2 Vitamin E influence natural immunity	18
II.3.3 Vitamin E influence humoral immunity	18
II.3.4 Vitamin E influence cellular immunity	20

	PAGE
II.4 Objectives of study	22
III MATERIALS AND METHODS	
III.1 Chemicals and reagents	23
III.2 Experimental instruments	23
III.3 Methods	24
III.3.1 Experimental design	25
III.3.2 Feed preparation	27
III.3.3 Determination of Aujeszky's disease antibody titer	27
III.3.3.1 Serum collection	27
III.3.3.2 Microtitration serum-virus neutralization test	27
III.3.4 Determination of lymphocyte proliferation	31
III.3.4.1 Peripheral blood mononuclear cell preparation	31
III.3.4.2 Lymphocyte proliferation culture	32
III.3.5 Determination of plasma or serum α -tocopherol	35
III.3.6 Determination of total vitamin E in feed	38
III.3.7 Production performance recording	39
IV RESULTS	
IV.1 Effect of vitamin E on AD titer	41
IV.2 Effect of vitamin E on area under AD titer curve	44
IV.3 Effect of vitamin E on in vitro lymphocyte proliferation	46
IV.4 Determination of vitamin E on total vitamin E in feed	54
IV.5 Effect of vitamin E on serum α -tocopherol	56
IV.6 Effect of vitamin E on plasma α -tocopherol	59
IV.7 Effect of vitamin E on production performance	62

V DISCUSSION AND SUMMARY	66
VI REFERENCES	75
VII APENDIX	85
VIII CURRICULUM VITAE	99

LIST OF TABLES

TABLE	PAGE
1. Physical properties of tocopherol	5
2. Tocopherol content of refined vegetable oils	6
3. Effect of vitamin E treatments on \log_2 AD titer responding to vaccinations on day 0 and 14	42
4. Effect of vitamin E treatments on area under AD titer curve mean during 28 days trial	44
5. Effect of vitamin E treatments on ^3H -thymidine incorporation of PHA-stimulated PBMLs proliferation in weaned pigs	48
6. Effect of vitamin E treatments on ^3H -thymidine incorporation of ConA-stimulated PBMLs proliferation in weaned pigs	50
7. Effect of vitamin E treatments on ^3H -thymidine incorporation of PWM-stimulated PBMLs proliferation in weaned pigs	52
8. Determination of total vitamin E concentration in vitamin E dietary treatments used in the experiment 1 and 2	54
9. Effect of vitamin E treatments on pig serum α -tocopherol level in experiment 1	57
10. Effect of vitamin E treatments on pig plasma α -tocopherol level in experiment 2	60
11. Effect of vitamin E treatments on average daily gain during 28 days trial in experiment 1	62
12. Effect of vitamin E treatments on feed conversion ratio during 28 days trial in experiment 1	64

	PAGE
13. Effect of vitamin E treatments on average daily gain during 40 days trial in experiment 2	65
14. Effect of vitamin E treatments on feed conversion ratio during 40 days trial in experiment 2	65

LIST OF FIGURES

FIGURE	PAGE
1 Chemical structure of vitamin E group	4
2 Lipid peroxidation chain reaction	11
3 Chemical composition of some membranes	13
4 Effect of dietary vitamin E treatments on \log_2 AD titer in experiment 1	43
5 Effect of dietary vitamin E treatments on area under \log_2 AD titer curve in experiment 1	45
6 Effect of dietary vitamin E treatments on ^3H -thymidine in corporation of porcine PBMCs activated by PHA in experiment 2	49
7 Effect of dietary vitamin E treatments on ^3H -thymidine in corporation of porcine PBMCs activated by Con A in experiment 2	51
8 Effect of dietary vitamin E treatments on ^3H -thymidine in corporation of porcine PBMCs activated by PWM in experiment 2	53
9 Analyses of total vitamin E concentration in dietary treatments used in experiment 1 and 2	55
10 Effect of dietary vitamin E treatments on serum α -tocopherol concentrations in experiment 1	58
11 Effect of dietary vitamin E treatments on plasma α -tocopherol concentrations in experiment 2	61
12 Effect of vitamin E treatments on average daily gains	63
13 Effect of vitamin E treatments on feed conversion ratio	64

ABBREVIATIONS

Ab	antibody
AD	Aujeszky's disease
ADCC	antibody dependent cell mediated cytotoxicity
ADG	average daily gain
Ag	antigen
CD	cluster of differentiation
CMI	cell mediated immunity
CPE	cytopathic effect
cpm	count per minute
CTLs	cytolytic T lymphocyte
FCR	feed conversion ratio
FCS	fetal calf serum
g	gram
h	hour
Ig	immunoglobulin
IL	interleukin
IU	international unit
kg	kilogram
LDL	normal low density lipoprotein
MEM	minimal essential medium
mg	milligram
MHC	major histo compatibility complex
PBMC	peripheral blood mononuclear cell
PGE ₂	prostaglandin E ₂
PK-15	porcine kidney cell line

PUFA	polyunsaturated fatty acid
SFM	serum free medium
SN	serum-virus neutralization
TBP	tocopherol binding protein
TCID ₅₀	tissue culture infective dose
VLDL	very low density lipoprotein
X g	gravity force
α	alpha
β	beta
γ	gamma
δ	delta
$^{\circ}\text{C}$	degree Celsius
μCi	microcurie
Δcpm	mitogen stimulated cpm minus unstimulated cpm
μg	microgram
