ABSTRACT	iv
LIST OF TABLES	x
LIST OF FIGURES	xiii
ABBREVIATIONS	xvii
CHAPTER 1 INTRODUCTION	
1.1 Uranium	1
1.1.1 General	1
1.1.2 Applications of uranium	2
1.1.3 Determination of uranium	3
1.2 Yttrium	7
1.2.1 General	7
1.2.2 Applications of yttrium	9
1.2.3 Determination of yttrium	10
1.3 Flow Injection Analysis	15
1.4 Aims of the Thesis	16
CHAPTER 2 EXPERIMENTAL, RESULTS AND DISCUSSION	
2.1 Apparatus and Chemicals	17
2.1.1 Apparatus	17
2.1.2 Chemicals	17

2.1.3 Stock solutions	18
2.2 Determination of Uranium by Flow Injection Fluorimetry	20
2.2.1 Preliminary study on fluorescence spectra of uranium in aqueous solution	20
2.2.2 Preliminary study on fluorescence spectra of uranium in buffer solutions of pH 8	23
2.2.2.1 Buffer solutions with phosphate species	23
2.2.2.2 Other buffers	28
2.2.2.3 Summary	33
2.2.3 Preliminary study on fluorescence spectra of uranium in phosphoric and sulfuric acid solutions	34
2.2.3.1 The effect of pH of acid solutions	37
2.2.3.2 Buffer solutions of pH 3-4	38
2.2.4 Development of flow injection analysis systems	43
2.2.4.1 Single line manifold	43
2.2.4.2 Two line manifold	56
2.3 Determination of Yttrium by Flow Injection Analysis	61
2.3.1 Molar absorptivity study	61
2.3.2 FIA manifold design	62
2.3.2.1 Three line manifold	62
2.3.2.2 Two line manifold	64
2.3.3 Resin for yttrium preconcentration	67
2.3.4 Optimisation	72

2.3.4.1 Conventional method	72
2.3.4.2 Simplex optimisation	82
2.3.5 pH of sample	89
2.3.6 Effect of water washing time	90
2.3.7 Calibration curve	91
2.3.8 Effect of preconcentration time	93
2.3.9 Adsorption onto glass	95
2.3.10 Interferences	97
2.3.11 Determination of yttrium in tin tailing leachates	98
CHAPTER 3 CONCLUSION	99

APPENDIX D	116

LIST OF TABLES

TABLE	Page
1.1 Some fluorimetric methods for the determination of uranium.....	6
1.2 Review of yttrium determination by spectrophotometry.....	12
1.3 FIA techniques for the determination of yttrium.....	14
2.2.1 Emission intensity of uranium in aqueous media at pH 8.....	23
2.2.2 Emission intensity of uranium in citric acid - Na_2HPO_4	24
2.2.3 Emission intensity of uranium in KH_2PO_4 - NaOH	26
2.2.4 Emission intensity of uranium in Na_2HPO_4 - KH_2PO_4	28
2.2.5 Emission intensity of uranium in NH_4Cl - NH_3	29
2.2.6 Emission intensity of uranium in $\text{Na}_2\text{B}_4\text{O}_7$	32
2.2.7 Maximum excitation and emission wavelengths of uranyl ion at pH 8	33
2.2.8 Fluorescence intensity of uranium in acid solutions.....	36
2.2.9 Fluorescence of uranium in KH_2PO_4 - Na_2HPO_4 at various pH.....	37
2.2.10 Fluorescence of uranium in K_2HPO_4 - H_3PO_4	42
2.2.11 Summary of maximum excitation and emission wavelengths of uranyl ion at pH 3.5.....	42
2.2.12 Emission intensity of uranium when using GG as an emission filter.....	45
2.2.13 Emission intensity of uranium when using PP as an emission filter.....	47
2.2.14 Effect of carrier flow rates on peak height.....	48
2.2.15 Effect of $\text{Na}_2\text{B}_4\text{O}_7$ concentrations on peak height.....	49

2.2.16	Effect of mixing coil lengths on peak height.....	50
2.2.17	Effect of sample volumes on peak height.....	51
2.2.18	Effect of initial pH on that of final solution	53
2.2.19	The emission efficiency of a normal glass filter compared with that of 4 PP filters.....	54
2.2.20	Peak height obtained with uranium standard solutions from 1 to 5 mg/l.....	55
2.2.21	Peak heights obtained from single and two line manifolds.....	57
2.2.22	Effect of NaOH concentrations on peak height.....	58
2.2.23	Effect of K ₂ HPO ₄ concentrations on peak height.....	59
2.3.1	Peak height obtained for yttrium standard solution using a three line manifold	64
2.3.2	Peak height obtained for yttrium standard solution using a two line manifold.....	66
2.3.3	Peak height of yttrium standard solution 0.01 mg/l with preconcentration time of 5 minutes from various types of resin.....	70
2.3.4	Peak height of yttrium standard solution 0.05 mg/l with preconcentration time of 3 minutes from various types of resin.....	70
2.3.5	Effect of HCl concentrations on peak height.....	72
2.3.6	Effect of buffer concentrations on peak height.....	73
2.3.7	Effect of Arsenazo III concentrations on peak height.....	74
2.3.8	Effect of flow rates of eluent on peak height.....	75
2.3.9	Effect of flow rates of reagent on peak height.....	76

2.3.10	Effect of mixing coil 1 lengths on peak height.....	77
2.3.11	Effect of mixing coil 2 lengths on peak height.....	78
2.3.12	Effect of loading flow rates on peak height.....	79
2.3.13	Effect of resin column lengths on peak height.....	80
2.3.14	The initial vertices of simplex method for yttrium determination.....	84
2.3.15	All of vertices in simplex method for yttrium determination.....	86
2.3.16	The comparison of FIA optimum conditions obtained between conventional and simplex methods	88
2.3.17	Effect of pH sample solutions on peak height.....	90
2.3.18	Effect of water washing times on peak height.....	90
2.3.19	The absorbance obtained from varying either yttrium standard solutions or preconcentration times.....	91
2.3.20	Effect of preconcentration times on peak height.....	94
2.3.21	Effect of adsorbed ions onto glass surface.....	96
2.3.22	Summary of interferences.....	97
2.3.23	Determination of yttrium in tin tailing leachates.....	98
B.1	Effect of interfering ions in flow injection analysis for yttrium determination.....	112

LIST OF FIGURES

FIGURE	Page
1.1.1 Some reactions of uranium.....	2
1.2.1 Some reactions of yttrium.....	9
2.2.1 Fluorescence spectra of uranyl ion in aqueous solution.....	20
2.2.2 Effect of pH on fluorescence spectra of uranyl solution.....	21
2.2.3 Fluorescence spectra of uranium in aqueous media.....	22
2.2.4 Calibration curve of uranium in aqueous media.....	22
2.2.5 Excitation and fluorescence spectra of uranium in phosphate buffer ...	23
2.2.6 Fluorescence spectra of uranium in citric acid - Na_2HPO_4	24
2.2.7 Emission intensity of uranium in citric acid - Na_2HPO_4	25
2.2.8 Fluorescence spectra of uranium in KH_2PO_4 - NaOH	25
2.2.9 Emission intensity of uranium in KH_2PO_4 - NaOH	26
2.2.10 Fluorescence spectra of uranium in Na_2HPO_4 - KH_2PO_4	27
2.2.11 Emission intensity of uranium in Na_2HPO_4 - KH_2PO_4	27
2.2.12 Fluorescence spectra of uranium in NH_4Cl - NH_3	28
2.2.13 Emission intensity of uranium in NH_4Cl - NH_3	29
2.2.14 Fluorescence spectrum of uranium in NH_4NO_3 - NH_3	30
2.2.15 Fluorescence spectrum of uranium in triethanolamine.....	30
2.2.16 Fluorescence spectra of uranium in glycine - NaOH	31
2.2.17 Fluorescence spectra of uranium in $\text{Na}_2\text{B}_4\text{O}_7$	31

2.2.18	Emission intensity of uranium in $\text{Na}_2\text{B}_4\text{O}_7$	32
2.2.19	Fluorescence spectra of uranium in H_2SO_4	34
2.2.20	Fluorescence spectra of uranium in H_3PO_4	35
2.2.21	Fluorescence spectra of uranium in H_2SO_4 - H_3PO_4	35
2.2.22	Calibration of uranium in acid solutions.....	36
2.2.23	Fluorescence intensity of uranium at various pH values.....	38
2.2.24	Fluorescence spectrum of uranium in sodium acetate - acetic acid.....	39
2.2.25	Fluorescence spectrum of uranium in potassium hydrogen tartate.....	39
2.2.26	Fluorescence spectrum of uranium in sodium formate - formic acid.....	40
2.2.27	Fluorescence spectrum of uranium in glycine - HCl	40
2.2.28	Fluorescence spectra of uranium in KH_2PO_4 - H_3PO_4	41
2.2.29	Calibration for uranium in KH_2PO_4 - H_3PO_4 buffer	41
2.2.30	Single line manifold for the fluorimetric determination of uranium.....	44
2.2.31	Calibration with GG emission filters.....	46
2.2.32	Calibration with PP emission filters.....	47
2.2.33	Effect of carrier flow rates on peak height.....	47
2.2.34	Effect of $\text{Na}_2\text{B}_4\text{O}_7$ concentrations on peak height.....	48
2.2.35	Effect of mixing coil lengths on peak height.....	50
2.2.36	Effect of sample volumes on peak height.....	51
2.2.37	Effect of initial pH on peak height.....	53
2.2.38	Calibrations using a normal glass filter compared with that of 4 PP filters.....	54

2.2.39	Response of uranium standard solutions from 1 to 5 mg/l.....	55
2.2.40	Two line manifold for the fluorimetric determination for uranium.....	56
2.2.41	Calibrations from single and two line manifolds.....	57
2.2.42	Effect of NaOH concentrations on peak height.....	58
2.2.43	Effect of K_2HPO_4 concentrations on peak height.....	60
2.3.1	Absorption spectra of yttrium - Arsenazo III complex.....	61
2.3.2	Three line FIA manifold.....	62
2.3.3	Calibrations for yttrium standard solution with a three line manifold.....	63
2.3.4	Two line FIA manifold.....	64
2.3.5	Calibrations for yttrium standard solutions with a two line manifold.....	65
2.3.6	FIA manifold for preconcentration study.....	68
2.3.7	Peak heights obtained from various types of resin using yttrium standard 0.01 mg/l with preconcentration time 5 minutes.....	69
2.3.8	Peak heights obtained from various types of resin using yttrium standard 0.05 mg/l with preconcentration time 3 minutes.....	71
2.3.9	Effect of HCl concentrations on peak height.....	73
2.3.10	Effect of buffer concentrations on peak height.....	74
2.3.11	Effect of Arsenazo III concentrations on peak height.....	75
2.3.12	Effect of flow rates of eluent on peak height.....	76
2.3.13	Effect of flow rates of reagent on peak height.....	77
2.3.14	Effect of mixing coil 1 lengths on peak height.....	78
2.3.15	Effect of mixing coil 2 lengths on peak height.....	79

2.3.16	Effect of loading flow rates on peak height.....	80
2.3.17	Effect of resin column lengths on peak height.....	81
2.3.18	Effect of pH sample solutions on peak height.....	89
2.3.19	Signals from yttrium standard solutions loaded for a preconcentration time of 6 minutes.....	92
2.3.19	Calibration for yttrium standard solutions loaded for a preconcentration time of 6 minutes.....	92
2.3.20	Calibration for yttrium standard solutions loaded for various preconcentration times.....	93
2.3.21	Effect of preconcentration time on peak height.....	95
2.3.22	Effect of adsorbed ions onto glass surface.....	96
A.1	The simplex in two dimensions.....	108
A.2	The moving in normal progression of two dimension simplex.....	108
A.3	Failure of simplex on ridge.....	109
A.4	Progress of simplex on ridge.....	110

ABBREVIATIONS AND UNITS

λ	wavelength
λ_{ex}	excitation wavelength
λ_{em}	emission wavelength
ϵ	molar absorptivity
V	volt
mV	millivolt
MeV	mega electron volt
Fig.	figure
M	molarity
N	normality
sens.	sensitivity
ref.	reference
v/v	volume by volume
w/v	weight by volume
