Abstract	iv
List of Tables	xi
List of Illustrations	xiii
Abbreviations and Symbols	xv
1. INTRODUCTION	1
1.1 Amphetamine	1
1.2 Methamphetamine	7
1.3 Ephedrine	8
1.4 Analysis of Amphetamine, Methamphetamine and Ephedrine	10
1.5 Sample Preparation	11
1.5.1 Solid Phase Extraction	12
1.6 Derivatization	12
1.7 Gas Chromatography - Mass Spectrometry	16
1.7.1 System configuration	17
1.7.2 Electron ionization	19
1.7.3 Mass analysis	20
1.8 The Scope and Aims of This Research	21
2. EXPERIMENTAL	22
2.1 Apparatus and Chemicals	22
2.1.1 Apparatus	22
2.1.2 Chemicals	23

2.2 Preparation of Solutions	24
2.2.1 Preparation of Standard Solutions	24
2.2.1.1 Stock Standard Solution	24
2.2.1.2 Working Standard Solution without Internal Standard	24
2.2.1.3 Internal Standard Solution	24
2.2.1.4 Working Standard Solution with the Presence of Internal Standard	24
2.2.2 Preparation of SPE Solutions	25
2.2.2.1 Phosphate buffer Solutions	25
2.2.2.2 Rinse Solutions	25
2.2.2.3 Elution Solutions	25
2.2.2.4 Sample Preparation	25
2.3 Optimization of GC-MS Condition	25
2.3.1 GC parameters optimization	26
2.3.2 MS parameters optimization	26
2.4 Calibration Curves	26
2.5 Limit of Detection	26
2.6 Linearity, Repeatability and Reproducibility	27
2.7 Optimization of SPE Condition	27
2.8 HFBA Derivatization	27
2.9 Recovery Assay	28
2.10 Analysis of Urine Samples	28
3. RESULTS	31
3.1 Optimization of GC-MS Condition	31
3.1.1 Optimal GC parameters	31
3.1.2 Optimal MS parameters	47
3.1.3 Summary of Optimized GC - MS Condition	47

3.2 Limit of Detection	54
3.3 Linearity	54
3.4 Repeatability and Reproducibility	59
3.5 Optimization of SPE Condition	59
3.6 Recovery Assay	60
3.7 Analysis of Urine Samples	61
4. DISCUSSION AND CONCLUSIONS	63
4.1 Discussion	63
4.2 Conclusions	67
REFERENCES	70
APPENDIX	73
VITA	78

LIST OF TABLES

Table	page
1.1 Physical properties of amphetamine	2
1.2 Physical properties of methamphetamine	7
1.3 Physical properties of ephedrine	9
3.1 Influence of injector temperature	31
3.2 Influence of initial temperature	32
3.3 Influence of final temperature	32
3.4 Influence of ramp rate in program temperature	33
3.5 Influence of flow rate of carrier gas	33
3.6 Influence of initial temperature with the presence internal standard	34
3.7 Influence of injector temperature of HFBA derivatives	34
3.8 Influence of initial temperature of HFBA derivatives	34
3.9 Influence of final temperature of HFBA derivatives	35
3.10 Influence of ramp rate in program temperature of HFBA derivatives	35
3.11 Influence of flow rate of carrier gas of HFBA derivatives	35
3.12 Influence of manifold temperature of HFBA derivatives	47
3.13 Influence of ion trap temperature of HFBA derivatives	47
3.14 Optimized GC-MS condition for analysis of underivatized drugs	48
3.15 Optimized GC-MS condition for analysis of HFBA derivatives	48
3.16 Retention times and selected ions used for the identification of underivatized drugs	49
3.17 Retention times and selected ions used for the identification of HFBA derivatives	49
3.18 Limit of detection of underivatized drugs and HFBA derivatives	54

3.18 Limit of detection of underivatized drugs and HFBA derivatives	54
3.19 Linearity and correlation coefficient of underivatized drugs	54
3.20 Linearity and correlation coefficient of HFBA derivatives	54
3.21 Repeatability of underivatized drugs	58
3.22 Repeatability of HFBA derivatives	58
3.23 Reproducibility of underivatized drugs	58
3.24 Reproducibility of HFBA derivatives	59
3.25 The effect of pH values of urine on SPE	59
3.26 The effect of rinse solution of urine on SPE	59
3.27 The effect of elution solution of urine on SPE	60
3.28 Recovery of amphetamine, methamphetamine and ephedrine in urine sample	60
3.29 Limit of detection of sample	61
3.30 Analysis of amphetamine, methamphetamine and ephedrine in urine samples	61

LIST OF ILLUSTRATIONS

Figure	page
1.1 Amphetamine structure	2
1.2 Metabolic pathway for amphetamine and methamphetamine	6
1.3 Methamphetamine structure	7
1.4 Ephedrine structure	8
1.5 Solid Phase Extraction process	13
1.6 Vacuum manifold column processor	14
1.7 Process of mass spectrometry	17
1.8 Data generated by GC-MS system	17
1.9 The GC-MS system	18
1.10 Energy versus ionization plot	19
1.11 Three common types of mass analyzers	20
2.1 Chromatogram of selected drugs for internal standard selection	29
2.2 Scheme of procedure for amphetamine, methamphetamine and ephedrine determination	30
3.1 Chromatogram of mixed standard showing the effect of injector temperature	36
3.2 Chromatogram of mixed standard showing the effect of initial temperature	37
3.3 Chromatogram of mixed standard showing the effect of final temperature	38
3.4 Chromatogram of mixed standard showing the effect of ramp rate in program temperature	39
3.5 Chromatogram of mixed standard showing the effect of flow rate of carrier gas	40
3.6 Chromatogram of mixed standard showing the effect of initial temperature with the presence internal standard	41

3.7 Chromatogram of mixed standard HFBA derivatives showing the effect of injector temperature	42
3.8 Chromatogram of mixed standard HFBA derivatives showing the effect of initial temperature	43
3.9 Chromatogram of mixed standard HFBA derivatives showing the effect of final temperature	44
3.10 Chromatogram of mixed standard HFBA derivatives showing the effect of ramp rate in program temperature	45
3.11 Chromatogram of mixed standard HFBA derivatives showing the effect of flow rate of carrier gas	46
3.12 Mass spectra and chromatogram of underivatized drugs	50
3.13 Mass spectra and chromatogram of HFBA derivatives	51
3.14 Mass fragmentation patterns of a) amphetamine b) amphetamine-HFBA	52
3.15 Mass fragmentation patterns of a) methamphetamine b) methamphetamine-HFBA	52
3.16 Mass fragmentation patterns of a)ephedrine b)ephedrine-HFBA	53
3.17 Mass fragmentation patterns of a)phenylpropanolamine b)phenylpropanolamine-HFBA	53
3.18 Linearity of amphetamine	55
3.19 Linearity of amphetamine-HFBA	55
3.20 Linearity of methamphetamine	56
3.21 Linearity of methamphetamine-HFBA	56
3.22 Linearity of ephedrine	57
3.23 Linearity of ephedrine-HFBA	57

ABBREVIATIONS AND SYMBOLS

amp	amphetamine
AR	analytical reagents
B.E.	Buddhist Era
C ₁₈	octadecyl sorbent
CI	chemical ionization
CNS	Central Nervous System
DB-5MS	95% dimethyl-5%diphenylpolysiloxane
EI	electron ionization
eph	ephedrine
EtOH	ethanol
eV	electron volts
GC	gas chromatography
GC-MS	gas chromatography - mass spectrometry
HFBA	heptafluorobutyric anhydride
HPLC	high performance liquid chromatography
met	methamphetamine
mg	milligram
min	minute
ml	milliliter
MS	mass spectrometry
M.W.	molecular weight
m/z	mass to charge ratio
No.	number
phe	phenylpropanolamine

RSD	relative standard deviation
SPE	solid phase extraction
temp.	temperature
TIG	Thai Industrial Gas
TLC	thin layer chromatography
ug	microgram
ul	microliter
v/v	volume by volume
°C	degrees Celsius
>	greater than
%	percent
