ACKNOWLEDGEMENT

This research could not have been completed without the assistance of many people.

First, I would like to express my sincerely appreciation to my thesis advisor, Assistant Professor Dr. Linchong Pothiban for her scholarly guidance, interest, and support throughout this research study. I am very grateful to have the opportunity to study under her guidance. An equal thank is given to my co-advisor Instructor Totsaporn Khamphonsiri, my academic advisor Associate Professor, Sombat Chaiwan, and my Chinese advisor, Professor Lü Zhuoren, Deputy President, First Teaching Hospital of Xi'an Medical University for their academic guidance and kindness support.

Sincere appreciation is extended to the people at my home university: Professor Yao Jing-peng, Dean of Faculty of Nursing of Beijing Medical University (BMU), Assistant Professor Qu Wei-xiang, director of Nursing Department of People's Hospital of BMU, and Assistant Professor He Yusheng, director of Medical Informatics Department of People's Hospital of BMU, for their recommending me to enter

this program and providing variety of assistant and support throughout my study. I also want to express my thanks to the head nurses who gave me help during the period of data collection, and all the staff nurses who participated in this study in People's Hospital of BMU. Without their support and cooperation, this research study would have been impossible.

Special thanks to my family: my mother, my father, my parents in law, my husband, my daughter and my brothers for their understanding, love, constant support, and encouragement during my study in this program.

Finally, my appreciation is also given to China Medical Board of New York, for providing financial support for the program, and to Chiang Mai University in Thailand and Xi'an Medical University in China for administrating the program.

Liu Jun-e
