**ACKNOWLEDGEMENT**

I wish to express my sincere appreciation and high regard to Associate Professor Chaweewan Thongchai, my major thesis advisor, for her extraordinary help and guidance and careful attention in all aspects of the study. I have been very grateful to have an opportunity to study under her guidance. Appreciation is also given to Assistant Professor Srinuan Wiwatkunupakan and Dr. Pikul Nantachaipan, my co-advisors, for their kindness and support. I would like to express my appreciation to my committee members: Assistant Professor Dr. Warunee Fongkaew, Assistant Professor Dr. Ratanawadee Chontawan, and Associate Professor Wang Yong.

Most sincerely, I wish to express my appreciation to the experts from Faculty of Nursing of Chiang Mai University, Assist Professor Dr. Seepan Kantawang, Assistant Professor Dr. Sujitra Tiansawad, Dr. Ouyporn Tanmookayakoon, Assistant Professor Waraporn Lertpoonwilaikoon, and Assistant Professor Pikul Boonchaung for their validation of instruments of this study and valuable comments and suggestions.

Sincere appreciation is extended to my director and colleagues in China, Associate Professor Shen XueLi, dean of the psychiatric department of West China University of

IV

Medical Sciences (WCUMS), and Associate Professor Ying Lei, dean of the Faculty of Nursing of WCUMS for their recommendations to this program and support throughout my study. I wish to thank directors of nursing department of the first teaching hospital of WCUMS for their concerns and encouragement. Also, I would like to extend my gratitude to head nurses and psychiatrists in the psychiatric department of WCUMS for their support in data collection. My special thanks go to my husband, Zhang Qi, and my son, Zhang Jun yi, for their love, encouragement and confidence in my ability to success.

Finally, appreciation is also given to China Medical Board of New York for providing me financial support for this study.
