

## OBJECTIVES

1) To determine the dissolution profiles of Tenormin<sup>®</sup> [Zeneca (East Asiatic)] and the generic atenolol preparations (Prenolol<sup>®</sup>, Berlin Pharmaceutical and Tenolol<sup>®</sup>, Siam Pharmaceutical) [Dissolution testing].

2) To study the pharmacokinetics and to assess the bioequivalence of a single oral 50 and 100 mg of innovative and generic atenolol preparations in healthy Thai volunteers [Bioequivalence testing].
