## ACKNOWLEDGEMENT

This study has been accomplished with the help of the supervisory committee, from whom I continuously learn, and all staff of Department of Pharmacology for their instructions and their supports throughout my graduate study.

A sincere gratefulness to Dr. Noppamas Rojanasthien for valuable guidance on the research plan, data analysis and the writing of this thesis.

A sincere gratefulness to Assistant Prof. Dr. Maleeya Manorot for valuable guidance on the research plan, her help on medical care for the volunteers and the writing of this thesis.

A special gratefulness to Associate Prof. Duangsamorn Limpiti for valuable help on research methodology, data analysis and the writing in part of dissolution testing of this thesis.

A special gratefulness to Associate Prof. Dr. Chaichan Sangdee for valuable help on the writing of this thesis.

A special thanks is also extended to Associate Prof. Dr. Amphawan Apisariyakul for valuable guidance on research work.

Lastly, I would like to express my sincere thanks to all volunteers in this research work for their support during this educational experience.

Rawisut Wonghawsuk
