ACKNOWLEDGEMENT

The author wishes to express her appreciation to Associate Professor Dr. Usanee Vinitketkumnuen, with whom this research was conducted, for her constant instruction and interest during the course of study and her guidance in preparing the manuscripts. This thesis could not have been accomplished without her understanding and gracious assistance.

She is very thankful to Associated Professor Dr. Duangta Kanjanapothi, Department of Pharmacology, Associated Professor Dr. Nirush Lertprasertsuke, Department of Pathology and also to Assistant Professor Dr. Prachya Kongtawelert, Department of Biochemistry, Faculty of Medicine, Chiang Mai University, for their valuable advices and provision of laboratory facilities.

She is grateful for the research scholarship received from Prof. Yoshinari Ohnishi, Department of Bacteriology, School of Medicine, The University of Tokushima, Japan. She would like to extend her gracious thank to Assit. Prof. Dr. Takemi Kinouchi, and Dr. Keiko Kataoka, for their technical assistance during her staying at the University of Tokushima.

This thesis was partially supported by grant from the Thailand Research Fund.

She would like to express her sincere thanks to Miss Rawiwan Puatanachokechai, staff member of the department of Biochemistry for her kind suggestions, Mrs. Siriporn Panyateang, Mrs. Janya Tipsri and Mr. Teera Chewonarin for their kindly help and understandings, also many thanks for her friends for their kindness and friendship.

Finally, she is deeply indebted to her parents and family for their love, supporting, understanding and sincere encouragement.

Yaowarate Intiyot
