## ACKNOWLEDGEMENTS

I would like to express my heartfelt gratitude and appreciation to my supervisor and co-supervisors, Dr. Robert Molloy, Dr. Nipapan Molloy and Dr. Mongkon Rayanakorn, for their kind supervision, invaluable guidance and constant inspiration throughout the course of this project.

I am also very grateful to Prof. I. M. Ward, Prof. A. F. Johnson and Dr. T. M. Nicholson of the Interdisciplinary Research Centre (IRC) in Polymer Science and Technology, University of Leeds, UK, and to Prof. A. M. North, former President of the Asian Institute of Technology (AIT), Thailand, for their many useful suggestions and stimulating discussions on various aspects of this work.

Thanks are also due to Dr. Saran Poshychinda, Dr. Siriporn Tanodkaew and Mr. Chainoi Chanchaisompob of the National Metal and Materials Technology Center (MTEC) for their help and advice concerning the FT-Raman spectroscopy and gel permeation chromatography analyses.

I also wish to express my gratitude to the Chemistry Department, Faculty of Science, Chiang Mai University, for kindly providing me with the laboratory and library facilities which made this study possible and, in particular, to Mr. Somsak Aramruang and Mr. Narongchai Tongpituk, technicians in the Department, for their help with the nuclear magnetic resonance ( $^1\text{H-NMR}$ ) and infrared spectroscopic analyses respectively.

For their financial support, I am indebted to the National Science and Technology Development Agency (NSTDA) for the award of a Graduate Student Scholarship and to The British Council for a travel grant which supported a 3-month period of research training spent at the IRC in Polymer Science and Technology, University of Leeds, UK.

Last, and most of all, I am indebted to my family and Mr. Manoch Naksata for their tender love and steadfast encouragement which has enabled me to achieve success in my postgraduate education.

Wimol Saiyasombat
