ACKNOWLEDGEMENTS

The author wishes to express her sincere appreciation to her supervisor, Assistant Professor Dr. Saisunee Liawruangrath, for her kind supervision, guidance, continual encouragement and assistance throughout this research work.

The author is very much indebted to Acharn Sakchai Satienerakul of the Department of Chemistry, Maejo University for supplying Polarographic Analyzer.

The author wishes to acknowledge the provision of research facilities by the Department of Chemistry, Faculty of Science, Chiang Mai University.

Thanks are also due to all of the author's friends in the Department of Chemistry, Faculty of Science, Chiang Mai University.

The author would like to express her deepest gratitude to her parents for their tender love, continuous care, and encouragement during the preparation of this thesis.

Finally, the author would like to thank those whose names are not here listed, and those who have one way or another contributed to the success of this work.

Anong Srisopa
