ACKNOWLEDGEMENT

I would like to express my deep and sincere appreciation to my major thesis advisor, Assistant Professor Dr. Achara Sukonthasarn for her extraordinary help, thoughtful guidance, and encouragement throughout the study. An equal thanks goes to Assistant Professor Wanpen Eamjoy, my co-advisor and Associate professor Marayart Na Nakorn, my former co-advisor, for their kindly support, scholarly guidance, and careful attention to all aspects of the study.

Special appreciation is also given to my home university advisors, Professor Pan Cheng-en and Professor Huang Xiaoyuan for their thoughtful guidance, support and encouragement during the research process.

I am grateful to the nursing experts at Faculty of Nursing, Chiang Mai University, Thailand, for reviewing my research instruments and giving suggestion.

Further thanks is extended to the directors, head nurses and nursing staff of Burn and Plastic Surgical department in three teaching hospitals of Hunan Medical University for their assistance in collection of data. I also extend my gratitude to all burned patients who participated in my study for their willingness to share information. They contribute a lot to my study.

Further thank is extended to Chiang Mai University and Xian Medical University for providing me the opportunity

IV

for the master degree study. A sincere thanks is also extended to China Medical Board of New York, Inc for providing financial support throughout the POHNED program.

My special thanks is extended to my parents, my siblings and their families, for their continuous support and encouragement throughout the study.

My very special thanks goes to my daughter and my husband for their understanding, unfailing supports, encouragement, and sacrifice throughout the program.

He Lianxiang
