ACKNOWLEDGEMENT

I would like to express my high regard and sincere appreciation to my major thesis advisor, Assistant Professor Wanpen Eamjoy for her scholar guidance, extraordinary help, and careful attention in all aspects of this study. I am very grateful to have the opportunity to study under her guidance. An equal thank is given to my co-advisor, Assistant Professor Thiphaphorn Tungamnuay for her valuable suggestion and encouragement, and also to my academic advisor Assistant Professor Dr. Achara Sukonthasarn for her kind support and careful concern.

Sincere appreciation is also extended to my Chinese advisor, Professor Wang Yong, and Professor Shao Weiwei, Dean of Faculty of Nursing of Xi'an Medical University for their great support throughout my study.

My special gratitude is extended to all the experts from Chiang Mai University who contributed their constructive suggestions for this study. I also would like to express my thanks to the staff of the Renal Transplant Outpatient Clinic of the First Teaching Hospital of Xi'an Medical University for their cooperation and assistance through out the period of data collection.

Most sincere appreciation is expressed to Dr. Carol Estwing Ferrans who is in the University of Illinois at

Chicago, for her kindly giving me permission to use Ferrans and Powers Quality of Life Index-Kidney Transplant Version with relevant guidance for using this instrument for this study.

The China Medical Board of New York, Inc. is deeply acknowledged for providing financial support. Chiang Mai University in Thailand and Xi'an Medical University in China are also acknowledged for conducting the program.

Finally, my special gratitude goes to my husband, Dr. Xue Wujun, for his valuable suggestion, assistance, and encouragement and also to my mother and my daughter for their understanding and emotional support.

Liu Ming
