May 24, 1999.

**ACKNOWLEDGEMENT**

I would like to express my sincere appreciation to my thesis advisor, Assistant professor Dr. Linchong Pothiban for her valuable guidance, constructive help, encouragement, and support throughout this study. An equal thank is given to Assistant Professor Nitaya Pinyokham, my co-advisor, Associate Professor Sombat Chaiwan, my academic advisor, and my Chinese advisor, professor Tan Yifei for their guidance and support.

Sincere appreciation is extended to Assistant Professor Zhou changju, Dean of the Faculty of Nursing of Hunan Medical University (HMU), Professor Yang Qidong, Director of Division of neurology, Xiangya hospital of HMU, professor Jiang Dongmei, director of Nursing Department of Xiangya hospital of HMU, and Lin Zhishou, Director of the Department of Foreign language of HMU for their assistant and support throughout my study.

My special gratitude is offered to my husband, my son, my parents, my sister, my brother, and my parents in law for their love, unflinching support and encouragement.

I extend special thanks to my classmates in this program, the personnel in the hospital where this study was conducted and clients who participated in my study for their willingness to share information. Without their support, I

would never complete this study.

Further thanks is also extended to Chiang Mai University and Xi'an Medical University for providing me the opportunity for this study. Finally, the appreciation is also given to China Medical Board of New York, for providing financial support for this study.
