ACKNOWLEDGEMENTS

First and foremost, I wish to express my heartfelt gratitude and appreciation to my supervisor and co-supervisor, Dr. Robert Molloy and Dr. Nipapan Molloy, for their kind supervision, valuable guidance and constant inspiration throughout the course of this research.

I am also grateful to Dr. Asira Fuongfuchat, researcher in the National Metal and Materials Technology Center (MTEC), for her valuable help and advice concerning the wet spinning process and fibre analysis and for kindly acting as an Examiner for this research project.

I also wish to express my sincere gratitude to the National Science and Technology Department Agency (NSTDA) for the honour of being awarded a Graduate Student Scholarship and to the Department of Chemistry, Faculty of Science, Chiang Mai University, for the provision of laboratory facilities and maintenance services which made this study possible.

Last and most of all, I am indebted to my family, Mr. Sawad, Mrs. Buakaew Chidthong, my brother for their tender love, care and to all of my friends for their endless encouragement which has enabled me to achieve success in my postgraduate education.

Rungtiwa Chidthong
