ACKNOWLEDGEMENTS

I thank Dr. Tippawan Prapamontol, my thesis advisor who took care me all experiment techniques, knowledge and thesis preparation. Especially thank to Archan, who encouraged me to participate in the 4th Chulabhorn International Congress. Thank you so much for giving me a chance to participate in Research Institute for Health Sciences (RIHES), Chiang Mai University. I appreciated indeed to have a chance to join in scientific researcher life-style.

I also thank Assoc. Prof. Dr. Ookeow Prakobvitayakit for her kind advice and patient in correcting and discussing my thesis work particularly on in ecological part. Thank to her advice in the using of ecological raw data efficiently. Especially thank her for improvement either main ideas or language using in this thesis.

Thank you very much to Assoc. Prof. Dr. Araya Jatisatiern for her kind advice in statistics which was play the important role in the judgement of the significantly different between tested elements and integration of the ecological with toxicological parts.

Many thank to Dr. Sukanya Linpisarn, Dr. Chaisuree Suphavailai, Dr. La-aied Prapantadara, and Mrs. Warunee Jit-arree for their kind help in laboratory facilities at the Research Institute for Health Sciences.

I also wish to thank laboratory technicians of International Postgraduate Programm on Environmental Science, and Biology Department Faculty of Science, Chiang Mai University for their permission to use and borrow ecological equipments.

I gratefully acknowledge the scholarship supported from Developing and Promotion of Science and Technology student (DPST), Thailand.

Gratefully, thanks you my beloved father and mother, and members in my family for supporting me through at the period of my study.

Deacha Tapunya
