ACKNOWLEDGEMENT

I would like to express my sincere and grateful appreciation and love to my thesis advisor, Assistant Professor Dr. Linchong Pothiban for her valuable guidance, constructive help, warm encouragement, and endless support throughout this study. An equal thank is given to Lecturer Totsaporn Khampolsiri, my co-advisor, Assistant Professor Dr. Paungpayom Panya, my academic advisor, my Chinese advisor, Professor Yang Lan, my committee members, Dr. Sirirat Panuthai and Associate Professor Lawan Somboon, my experts for testing the validity of instruments and many other Ajarns of Chiang Mai University for their guidance and support.

Sincere appreciation is extended to our dean Professor He Guoping and all staff of Nursing College of Hunan Medical University (HMU), Professor Zhou Changju, the previous Dean of the Faculty of Nursing of HMU, Professor Zhang Peide, my dear instructor of Nursing College of HMU, and Sun Yue, Associate Dean of the English Training Centre of HMU for their assistant and support throughout my study. My special gratitude is offered to my husband, my daughter, and my parents-in-law for their love, unfailing support and encouragement.

I extend special thanks to my classmates in this program, my good friends, the personnel in Xiang Ya Hospital where this study was conducted and clients who participated

IV

in my study for their willingness to share information. Without their support, I would never complete this study.

Further thanks is also extended to Chiang Mai University and Xi'an Medical University for providing me the opportunity for this study. Finally, the appreciation is also given to China Medical Board of New York, for providing financial support for this study.
