ACKNOWLEDGEMENT

I would like to express my sincere thanks and grateful appreciation to my academic and major advisor, Assistant Professor Dr.Khanokporn Sucamvang, for her kindness, thoughtfulness, understanding, encouragement, assurance, valuable guidance and helpful advise. Equal thanks is given to Assistant Professor Thiphaphorn Tungamnuay, my co-advisor for her helpful advice, constant support and encouragement.

I would also like to express my special thanks to my committee members for their kind assistance, valuable information and suggestions, helpful advice and assurance.

Sincere thanks and grateful appreciation is extended to Hong Kong Nurses' Training and Education Foundation for their recommendations and financial support that allowed me to enter this program and made my dream become true.

I am also very grateful to the people in my home university, First Teaching College, China Medical University, the former President Professor Ma Xiaowei, the current President Dr Li Jiguang, Associate President Dr. Lu Gang and Professor Yu Yiqiu, the Dean of Faculty of Nursing for their support, understanding, concern and help providing this chance for me.

Special thanks to Professor Dr. Fen Gangyu, the director of the orthopedics department, and Professor Yan Yindong for their strong support and understanding. I would like to extend my gratitude to the senior nurse and all the

IV

nursing staff in the orthopedic ward for their assistance and assuming the responsibilities.

I wish to thank the nursing experts at the Faculty of Nursing , Chiang Mai University , Thailand for assessing my research instrument and giving valuable suggestions.

I also wish to express my thanks to my dear friends, Zhang Liping, Su Lanruo and Duan Qiein for their special support, encouragement and friendship.

My special thanks go to my parents, parents in law, sisters and brothers, who have all shown support and concern and who have helped my husband and me to take care of my son and home during my study.

My love and deepest appreciation are given to my dearest husband, Professor Yang Xu, for his kindness, understanding, encouragement, support and patience and for giving me the excellent opportunity to pursue my master degree study and for his willingness to sacrifice and endure without any complaint. Many thanks to my lovely son, Yang Ziran, for his love, support, care, and for being a good boy which has helped to make this study a reality.
