ABBREVIATIONS	xiii
INTRODUCTION	
Inflammation	1
Mediators of inflammation	3
Anti-inflammatory drugs	11
Experimental models	13
Histological background of <i>Garcinia speciosa</i>	16
Purpose of the study	18
MATERIALS AND METHODS	
Plant material	19
Experimental animals	19
Drug administration	19
Experimental protocol	
- Ethyl phenylpropionate (EPP) and arachidonic acid (AA) – induced ear edema in rats	20
- Carrageenin – induced hind paw edema in rats	21
- Cotton pellet – induced granuloma formation in rats	23
- Acetic acid – induced writhing response in mice	27
- Indomethacin – induced gastric lesion	28

TABLE OF CONTENTS

	PAGE
- Pylorus ligation	30
- Statistical analysis	32
- Drugs and chemicals	33
RESULTS	
- Effect of GS extract and phenylbutazone on EPP-induced ear edema in rats	35
- Effect of GS extract, phenylbutazone and phenidone on arachidonic acid – induced ear edema in rats	35
- Effect of GS extract and aspirin on carrageenin – induced hind paw edema in rats	38
- Effect of GS extract, indomethacin and prednisolone on cotton pellet – induced granuloma formation in rats	40
- Effect of GS extract, morphine and aspirin on acetic acid – induced writhing response in mice	43
- Effect of GS extract and cimetidine on pylorus ligation	47
- Effect of GS extract and misoprostol on indomethacin-induced gastric lesions in rats	47

LIST OF TABLES

TABLE		PAGE
1	Inhibitory effect of GS extract and phenylbutazone on EPP-induced ear edema in rats	36
2	Inhibitory effect of GS extract, phenylbutazone and phenidone on AA-induced ear edema in rats	37
3	Inhibitory effect of GS extract and aspirin on carrageenin – induced hind paw edema in rats	39
4	Effect of GS extract, indomethacin and prednisolone on cotton pellet – induced granuloma formation in rats	
	4.1 Granuloma formation and transudation	41
	4.2 Body weight and thymus weight	42
	4.3 Alkaline phosphatase activity in the serum	44
5	Inhibitory effect of GS extract, morphine and aspirin on acetic acid – induced writhing response in mice	45
6	Effect of GS extract and cimetidine on pylorus ligation	48
7	Effect of GS extract and misoprostol on indomethacin-induced gastric lesions in rats	49

LIST OF FIGURES

FIGURE	PAGE
1 Scheme of the major metabolic transformations of arachidonic acid	7
2 "Pava" (<i>Garcinia speciosa</i>)	17
3 Diagram illustrating the water displacement method for measuring rat paw volume	22
4 Diagram illustrating the method for cotton pellet-induced granuloma formation in rats	24
5 Diagram illustrating the procedure of indomethacin-induced gastric lesion	29
6 Diagram illustrating the procedure of pylorus ligation	31
7 Log dose-response regression line of aspirin and GS extract on writhing response in mice	46
