ACKNOWLEDGEMENT

I would like to express my gratitude to my advisor, Assoc. Prof. Dr. Aranya Manosroi for her moral support, advice, guidance, assistance and especially for her patience in the correction of my thesis. I am grateful to my co-advisors Assoc. Prof. Dr. Jiradej Manosroi and Assoc. Prof. Dr. Boonsom Liawruangrath for their valuable help and advice during the experiment and thankful to Assoc. Prof. Pimporn Leelapornpisid for her kindness to be a member of the examining committee.

I am thankful to the companies which have donated the high quality compounds for this thesis, JJ-Degussa (T) Ltd., Thailand. for the Emulmetik 950[®] and Bristol-Myers Squibb (Thailand) Ltd. for the Fungizone[®]. I am thankful to the financial support from the Institute for Science and Technology Research and Development under the PCRNC (Pharmaceutical Cosmetic Raw Materials and Natural Products Research and Development Center), Chiang Mai University.

I appreciate all personnels and faculty members for their assistances in using the equipment at the Department of Pharmaceutical Chemistry and Department of Pharmacognosy, Faculty of Pharmacy and Assoc. Prof. Rujapa Nimsung at the Clinical Chemistry Department, Faculty of Associated Medical Sciences, and the technicians at the Medical Science Research Equipment Center, Faculty of Medicine, Chiang Mai University. I also appreciate the Mae Sa Snake Farm in Chiang Mai for the support of the shed snake skin in my preliminary study. I am very thankful to all of the staffs of the Department of Pharmaceutical Technology for the assistance and support.

Finally, I would like to be grateful to my parents for their patience and all the supports and thank to all of my friends for their love and encouragement throughout this study.

Lalana Kongkaneramt
