ACKNOWLEDGEMENT

I would like to express my extreme gratitude to my advisor, Assistant Professor Dr. Anchalee Pongchaidecha for her supervision, guidance and valuable suggestions throughout this research. I am very grateful to my co-advisor, Dr. Udompun Khansuwan for his helpful guidance, suggestion, and comments of this thesis.

I wish to appreciation to Mr. Terdsak Chaiwanna, medical technologist, Clinical Chemistry Laboratory, Central Diagnostic Laboratory, Maharaj Nakorn Chiangmai hospital for his kindness and helpful service of the chemical analysis. Moreover, sincerely thankful to staffs of the Veterinary Research Division of Health Sciences Research Institute and staffs of Dairy Farming Promotion Organization of Thailand for their kindness and co-operation.

Special thanks to Mr. Anant Yavinung, Mr. Keerati Sawatdipong, Miss Nattavadee Nokyungthong and Mr. Kittikorn Phromchan for their valuable assistance throughout the experiment.

I am also very grateful to all members of the supervisory graduate committee for suggestions of this thesis.

Sincerely thankful to all members in the department of Physiology, Faculty of Medicine, Chiang Mai University for their kindness.

Finally, I am extremely grateful to my family for their love, support and encouragement throughout my life.
