## ACKNOWLEDGEMENTS

First of all, grateful acknowledgement must be given to the Physics Department, Faculty of Science, Prince of Songkla University for support ABEM Terrameter SAS 300B and ABEM Wadi VLF instruments.

I would like to express my sincere gratitude to my supervisor, Assistant Professor Dr. Fongsaward S. Singharajwarapan for her generous, valuable guidance throughout my study.

I wish to express my deep appreciation to Assistant Professor Dr. Warawutti Lohawijarn who has given me the opportunity to study geophysics and has also sympathetically advised and supported.

Associate Professor Somjai Kanchanawong provided hydrochemical data from her project. I am grateful to her.

I also wish to thank to Mr. Kiattichai Tulathammakul and Mr. Somchai Wongsawat, senior geologist of Mineral Resources Region 3, Chiang Mai, for his kind support for field instruments and borehole data.

Special thanks to Mr. Sidney L. Rieb for improving my use of English. Thanks are also given to my friends for their helpful in field survey.

Finally, I dedicate this thesis to my parents whose love, inspiration, patience, and sacrifice let me reach this point.
