ACKNOWLEDGMENTS

The author would like to express his sincere thanks and appreciation to his supervisor, Associate Professor Dr. Kate Grudpan, for his invaluable guidance, graceful supervision and continual encouragement throughout the study, also to a co-supervisor, Assistant Professor Dr. Yuthsak Vaneesorn and thanks are also due to Assistant Professor Dr. Mongkon Rayanakorn.

The author is sincerely grateful to Dr. Ponlayuth Sooksamiti of Resources Region 3 (Chiang Mai) who is another co-supervisor for his kind assistance, valuable discussion and encouragement.

The “Dr. Bruno Werdelmann Foundation”, the National Science and Technology Development Agency (NSTDA), the Postgraduate Education and Research Program in Chemistry and Graduate School of Chiang Mai University are acknowledged for the graduate scholarships granted to the author. Lachat Instrument and Thai Unique are also acknowledged for the instrument on-loan and their partial support of the research.

The author is very grateful to Mr. Seksan Harirutseeree of Tuntex Petrochemicals (Thailand) Public Company Limited (Rayong), and Ms. Thanchanok Chuariyakul and Ms. Nipa Suwannakit of Regional Medical Science Center (Phitsanulok) for their assistance and valuable discussion.

The author is grateful to Dr. Jaroon Jakmune, Dr. Ngarmnet Worakijcharoenchai, Mr. Somchai Lapanantnoppakhun, and all of his friends in the room CB2426 for their partial assistance. The author would like to thank those whose name are not here listed, and those who have one way or another contributed to the success of this work.

Finally, the author is very grateful to his parents, his brothers and sisters for their tender love, continuous care and continual encouragement.

Wiboon Praditweangkum
